

Release Notes for DrChrono Web

2024-06-21

09/17/2024 11:09 pm EDT

What's new

Billing and Payments

Summary	Description	Knowledge Base Article
Added HCPCS codes	Four HCPCS codes have been added to the DrChrono system and can be added to your fee schedule and included on patient claims.	
Updates to the Remittance Report screen	We have made a few updates to the Remittance Report screen. The system now loads information specified in filters. The default date range has been changed to 30 days, however, there is no limitation when Trace #, Verification Status, or Insurance/Patient filters are used.	

Clinical

Summary	Description	Knowledge Base Article
"Inactive" provider accounts for Vaccine Records	Users can choose inactive providers from the Administered By drop-down list in the Immunizations Step 3 tab when creating a vaccination record. Contact DrChrono Support to turn this permission on.	Iron Bridge Integration
Supervising provider to reflect in the clinical note	In addition to the supervising provider's signature being visible at the bottom of the clinical note, their name will also appear in the "Provider section" of the header of each clinical note.	Creating a Supervising
CoverMyMeds - Manual prior authorization entries	A prescriber account will not required to enter prior authorization records in DrChrono manually.	

API

Summary	Description	Knowledge Base Article
Appointment webhooks were inconsistently triggering	Fixed an issue where the appointment_create webhooks are not sending any events even though an appointment was created. With this fix, appointment creations should trigger a webhook event each time.	

Resolutions

Product Area	Summary	Description
Practice Management	Corrected an incorrect "something went wrong" error page while clicking the "Show Archived" under the message center.	Fixed an issue where a "something went wrong" error page appeared while clicking the "Show Archived" under the message center. Users should be able to view the archived messages under the message center without getting an error page.

Now available

Summary	Description	Knowledge Base Article
---------	-------------	------------------------

Two-Factor Authentication (2FA) with Authy	To further protect your account, we encourage all users to enable two-factor authentication (2FA). When you log into your account, you may see a prompt encouraging you to enable 2FA. Remember, setting up 2FA is entirely your choice, but we highly recommend it for its added security. If you would like to enable 2FA to prevent getting an alert, you can follow the steps outlined in How do I set up Two-Factor Authentication (2FA) in my account? .	Two-Factor Authentic
