Release Notes for DrChrono Mobile Version 11.0.103

Last modified on 09/18/2024 6:24 pm EDT

New Feature

Summary	Description	Knowledge Base Article
New Login for SAML SSO Users	In this release, we have added the ability for users to log in via SAML SSO (Single Sign-On). SAML SSO simplifies your access process by allowing you to use your existing credentials from your identity provider. This new login workflow is part of our ongoing commitment to security and usability.	SSO New Login Workflow

Updates

Summary	Description
Past Appointments as Default	Now, the past appointments list is shown as the default segment on the appointment list screen.
Message Text Size	Message Text on the iPhone is now larger.
Patient Communication History	Patient Communication History is now clickable on the iPhone.
Appointment Scheduler Updates	The appointment scheduler widget now includes the list of offices and their exam rooms.

Resolutions

Summary	Description
Non-custom codes displayed in the clinical note's custom tab pick list	Fixed an issue where Clinical Note's custom tab pick list displays non-custom codes.
Message Center Navigation	Fixed an issue where navigation to the Message Center doesn't work.
Patient Name Overlap on iPhone	Fixed an issue where patient names overlap with the iPhones' bottom toolbar.
Macro Using Previous Context	Fixed an issue where macro uses the previous context while replying to a message instead of the current context.
