

# Error message: Missing Information: Ordering Provider office: zip code is missing

Last modified on 11/22/2024 3:36 pm EST

If you receive the error message on a claim that states "Missing Information: Ordering Provider office: zip code is missing", there is a simple fix.

Make sure when entering a referring or ordering provider in the patient's chart; demographics tab, that their address is listed on 2 separate lines.

Example: 123 Main Street

Anytown, MD 12345

If the address is listed all on one line, the system will reject with the error message "Ordering Provider Office: address in missing".

### Ordering Doctor

Ordering Doctor Search	<input type="text"/>	Will populate fields below
Ordering Dr. First Name	<input type="text"/>	
Ordering Dr. Middle Name	<input type="text"/>
