Hiding Billing Screens

Last modified on 10/26/2026 4:03 pm EDT

In DrChrono, you can now customize which billing screens are visible and hide any that you don't use. Your view will contain just the screens that you utilize.

Please note, you must have access to view billing screens via permissions to see or interact with this screen.

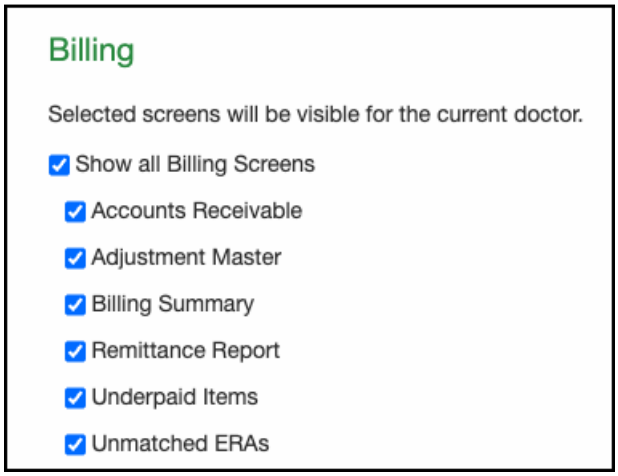

To customize your views:

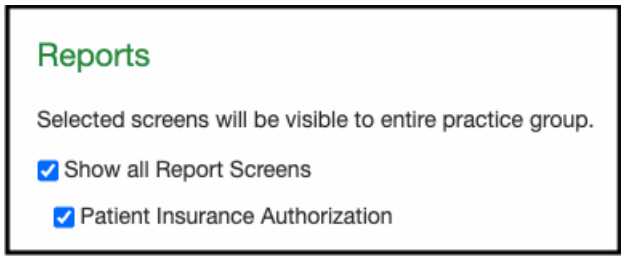

1. Navigate to **Account > Account Settings**
2. Ensure you are on the View tab

- This screen will allow you to toggle on/off different billing fields.
  - If the box is checked, you will see the screen in your DrChrono account.
  - If the box is not checked, you will not see the screen in your DrChrono account.

By default, all screens are checked. If you don't wish to see any of these screens, simply unselect the**blue** check box.

3. Once you have made your selections, press **Save Selection** on the right

4. Press **Update Entire Profile** on the left.
