MIPS Assist Program

What is the MIPS Assist Program?

MIPS Assist is a personalized support program designed to help healthcare providers and practice administrators navigate Medicare's Merit-based Incentive Payment System (MIPS) with confidence. Through one-on-one consultations with MIPS experts, we help you maximize your performance while minimizing penalties—so you can focus on patient care.

Why MIPS Matters to Your Practice

Your MIPS performance score directly impacts your Medicare reimbursements—with payment adjustments of up to 9% (positive or negative). The requirements are complex, change annually, and demand time you'd rather spend with patients. That's where we come in.

How MIPS Assist Helps You

- **Personalized Consultation:** We assess your practice and create a customized reporting strategy that fits your specialty and patient population.
- **Strategic Planning:** We help you select the right quality measures and improvement activities to maximize your score.
- **Ongoing Support:** Our experts remain available throughout the year to answer questions and troubleshoot issues.
- **Submission Assistance:** We guide you step-by-step through data submission to ensure accuracy and timely completion.

What You'll Achieve

- Minimize or avoid MIPS penalties
- Maximize bonus opportunities and positive payment adjustments
- Save valuable time with expert guidance
- Gain confidence that your MIPS reporting is handled correctly
