

Saving Your Pen and Color Selections When Using the Freedraw Tools on the iPhone

07/08/2024 7:16 pm EDT

If you have a certain pen/line type and color preference when using the Freedraw tools on your iPhone when using the DrChrono app, you can save those preferences so you have the same selections every time you use the freedraw fields.

1. To save the settings, you need to be in an appointment. Select an appointment and tap **Start Visit**.

The screenshot shows the DrChrono app interface on an iPhone. At the top, the status bar displays the time 9:25, signal strength, Wi-Fi, and battery icons. Below the status bar is a blue header with a back arrow, the text 'Back', and two icons: a person with a speech bubble and a person with a list. The main content area features a patient profile for Laurie T. Sample, a female aged 32, born 12/08/1990. Below the profile are links for 'Super Bill' and 'Vitals', and an information icon. A prominent blue button labeled 'Start Visit' is highlighted with a black arrow. Below the profile is a section titled 'Appointment Details' with a grey background, containing the following information: '12/05 09:10AM, 10 minutes', 'Follow Up', and a list of appointment details with expandable options: 'Appointment Profile' (Follow Up >), 'Appointment Status' (>), 'Appointment Status History' (>), 'Office' (Office 1 >), 'Exam Room' (Exam 1 >), 'Provider' (Dr. James Smith >), 'Supervising Provider' (>), and 'Billing Type' (ICD-10 >). At the bottom is a section titled 'Appointment Notes' with a grey background, containing five icons: 'Appointments' (calendar), 'Patients' (people), 'Messages' (envelope with 22 notifications), 'Tasks' (checklist with 14 notifications), and 'More' (three dots).

2. Select a freedraw field on a form.

The screenshot shows a mobile application interface for a medical form. At the top, there is a blue header bar with the time '9:26', signal strength, Wi-Fi, and battery icons. Below the header, there are navigation icons: a back arrow, 'Tools', a heart with pulse line, a settings icon with a red notification bubble, and a user profile icon. The form content includes:

- HPI**: A text input field with a blue pencil icon to its right.
- Is the patient new to pra...**: A toggle switch currently in the 'off' position.
- Findings**: A section header.
- Does the patient have a...**: Two radio buttons labeled 'Yes' and 'No', both unselected.
- Test**: A text input field with a slash '/' separator and another empty text input field.
- Pain Location**: A text input field with a vertical ellipsis menu icon to its right.
- Single**: A text input field with a dot '.' to its right.
- Patient Diagram**: A button with a blue dot grid icon and the text 'Free Draw'. A large black arrow points to this button from the right.
- Photo Documentation**: A button with a grey dot grid icon and the text 'Free Draw'.

At the bottom of the form, there is a toggle for 'Include in Note' which is turned on (green), and a button for 'Section Note' with an unselected checkbox.

3. Choose the pen and color selections you would like to save. In the top right of the freedraw screen, tap the settings icon (

). Tap the switches to save your pen and color selections. Your preferences will be saved and the next time you use the freedraw field your preferences will be there.
