Release Notes for DrChrono Mobile Version 11.0.99

Last modified on 11/06/2024 1:34 pm EST

What's new

### Clinical

Summary	Description	Knowledge Base Article
Support Multiple Supervising Provider Location SPIs and Removing a Supervising Provider	We have added the ability to support multiple supervising provider Location SPIs and the ability to remove a supervising provider to our mobile application.	

Practice Management

Summary	Description	Knowledge Base Article
DrChrono Appointment Scheduler - iOS	Enhancements have been made to the DrChrono appointment scheduler widget on iOS devices. We moved the allow overlapping and the duration flags to the new appointment scheduler screen's settings popover. We've also added a new popover screen accessible by tapping the list button next to the settings, which allows you to view a detailed list of all the appointments for the date selected.	Date and Time Selection During Appointment Creation Process on iPad and iPhone (iOS)
Removal of iOS 13 Support	DrChrono will no longer support iOS 13 for our apps (EHR, Check In, Onpatient). As a result, we have upgraded our libraries and have completed additional maintenance work for a smoother experience.	

Resolutions

Summary	Description
Billing codes in clinical notes or print/fax/add amendments in the EHR Mac App	Resolved an issue where billing codes in clinical notes or print/fax/add amendments in the EHR Mac App could not be deleted.
The library button is no longer blocked on iPhone 14 when adding an image to the free draw field.	Resolved an issue with the iPhone 14 front-facing camera lens blocking the "Library" button when adding an image to a free draw field.

Pop-up error when processing payment on iPad	Resolved an issue where customers received the error pop-up "Response status code was unavailable: 500. Please modify the line item on our website" after processing the patient payment successfully on iPad.
