

Fee Schedule - Overview

Last modified on 06/04/2026 11:32 am EDT

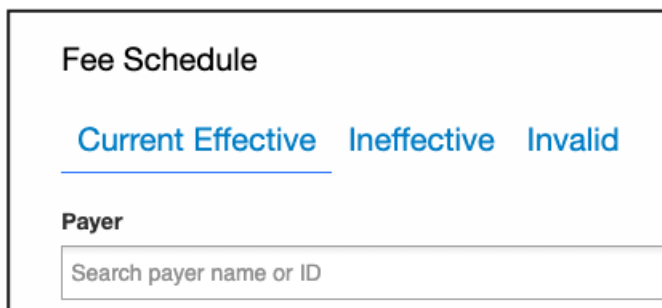

DrChrono has updated the fee schedule to include additional fields and functionality that can be customized to adapt to the needs of your practice.

Features include:

- The ability to have multiple effective fee schedules for specific providers, specific specialties, or practice locations.
- The ability to inactivate entire fee schedules, but leave them visible for reference or rebills for dates of service covered by the now inactive fee schedule.

To view your fee schedule:

1. Navigate to **Billing > Fee Schedule**.

From there, you will see this screen:

These are the headers you will see:

Payer ▾	Plan Name ▾	Assignee ▾	Effective Date ▾	Ineffective Date ▾	Action
---------	-------------	------------	------------------	--------------------	--------

If your practice uses multiple fee schedules, you can now quickly search across all of them using CPT, HCPCS, Custom Codes, ICD-10 codes, Revenue Codes, Modifiers, and Pick List Categories to find the information you need faster.
