

eProvider Solutions- Who are they?

09/11/2024 9:51 am EDT

ePS or eProvider Solutions is a clearinghouse that is integrated with DrChrono.

Through the setup process, your implementation specialist will show you how to submit EDI (claims), ERA (explanation of benefits), and eligibility inquiry requests with the payers you will be billing all from your DrChrono account.

Being able to initiate each request, receive real-time status updates, and receive any paperwork required by the payers within your account is quick and efficient and gives greater transparency into each of your requests.
