

What is OnPatient?

07/08/2024 7:23 pm EDT

OnPatient is a patient portal developed by [DrChrono EHR](#) that connects patients and providers. It is an easy, connected, and mobile way to manage your personal health information. OnPatient enables you to schedule appointments, communicate with your healthcare provider, review your health history information, and more - from any online or iOS compatible interface - iPhone or iPad.
