

Quick Charting on the iPhone

07/08/2024 7:26 pm EDT

You can use **Quick Charting** on the iPhone app to work on your clinical notes during a video visit.

After launching the video visit, you can tap on the patient's name to access **Quick Charting**.

You can then work on the clinical note. The small dot (

) in the upper right indicates that the video is active. The patient will not see your screen only the video of your face.

Once in a clinical note, tap **Back** to return to the other forms. Tap **Close** to leave Quick Charting.
