How to Turn On Share Patients

07/08/2024 7:26 pm EDT

If your practice has more than one provider, you have the option to turn on the **Share Patients** permission so that patients can be seen by different providers in the group other than their primary provider.

When **Share Patients** is enabled, users can view and interact with patients in the practice group whose primary provider is different from the primary provider selected on their staff account settings.

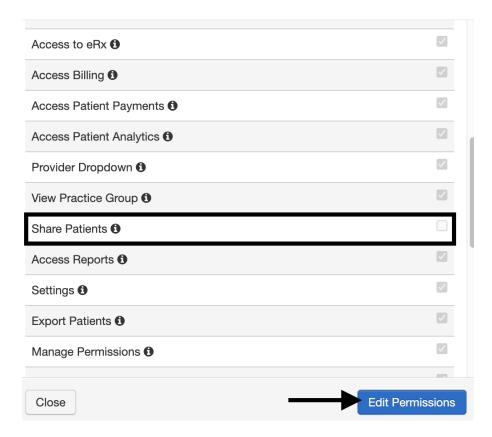

1. Go to Account > Staff Permissions.

2. Select View next to the provider or staff member to review their permissions.

3. Scroll down and find the **Share Patients** permissions. Select **Edit Permissions** to add this permission to the user.

4. Check the box for permission and select **Save Permissions**.
