

Push Notifications on iPad

07/08/2024 7:27 pm EDT

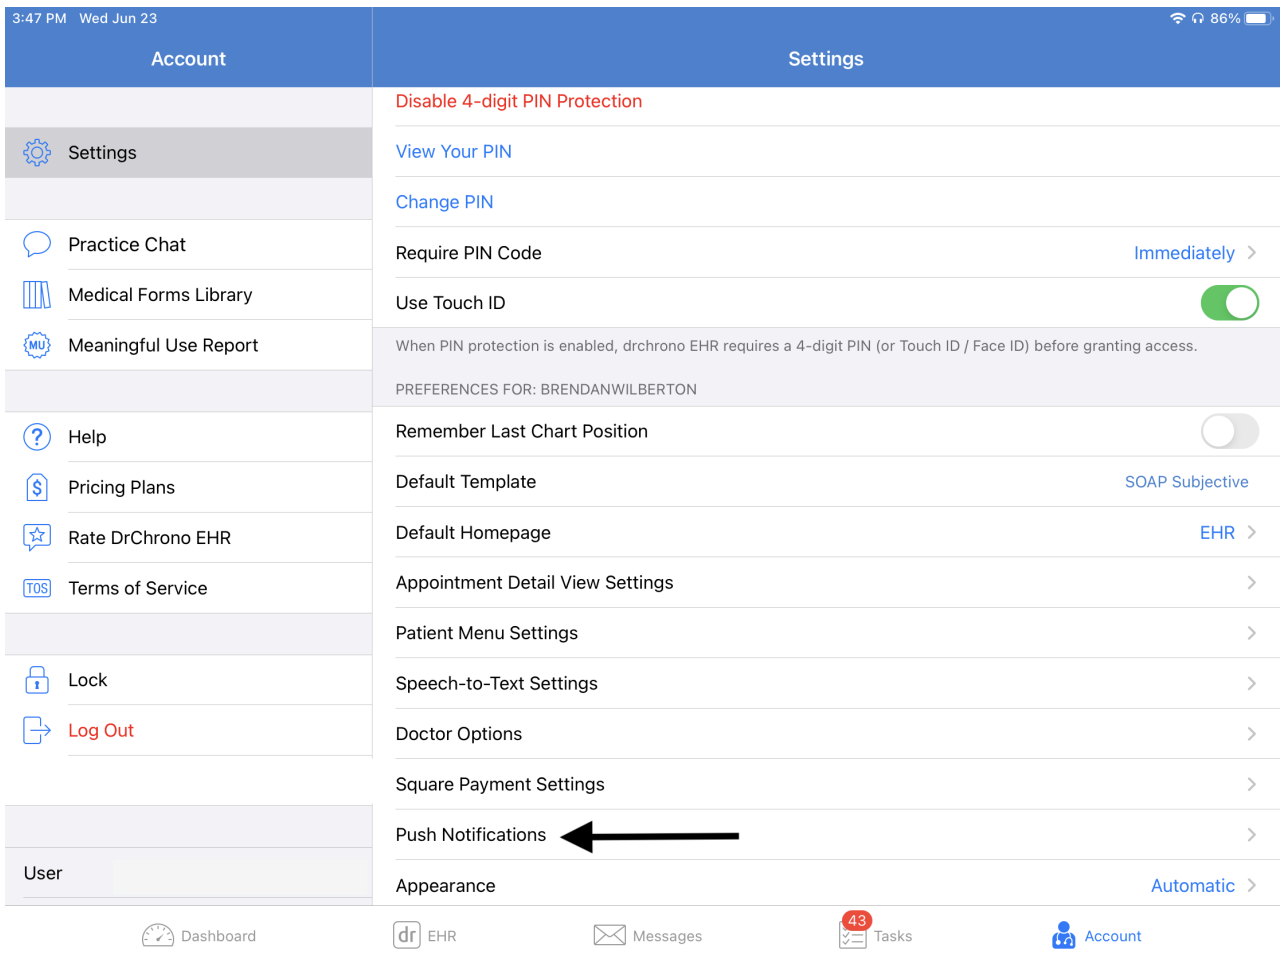

You can turn on push notifications for your iPhone so that you can be notified when certain activities happen.

1. Tap More and select Account Settings.

2. Select Push Notifications.

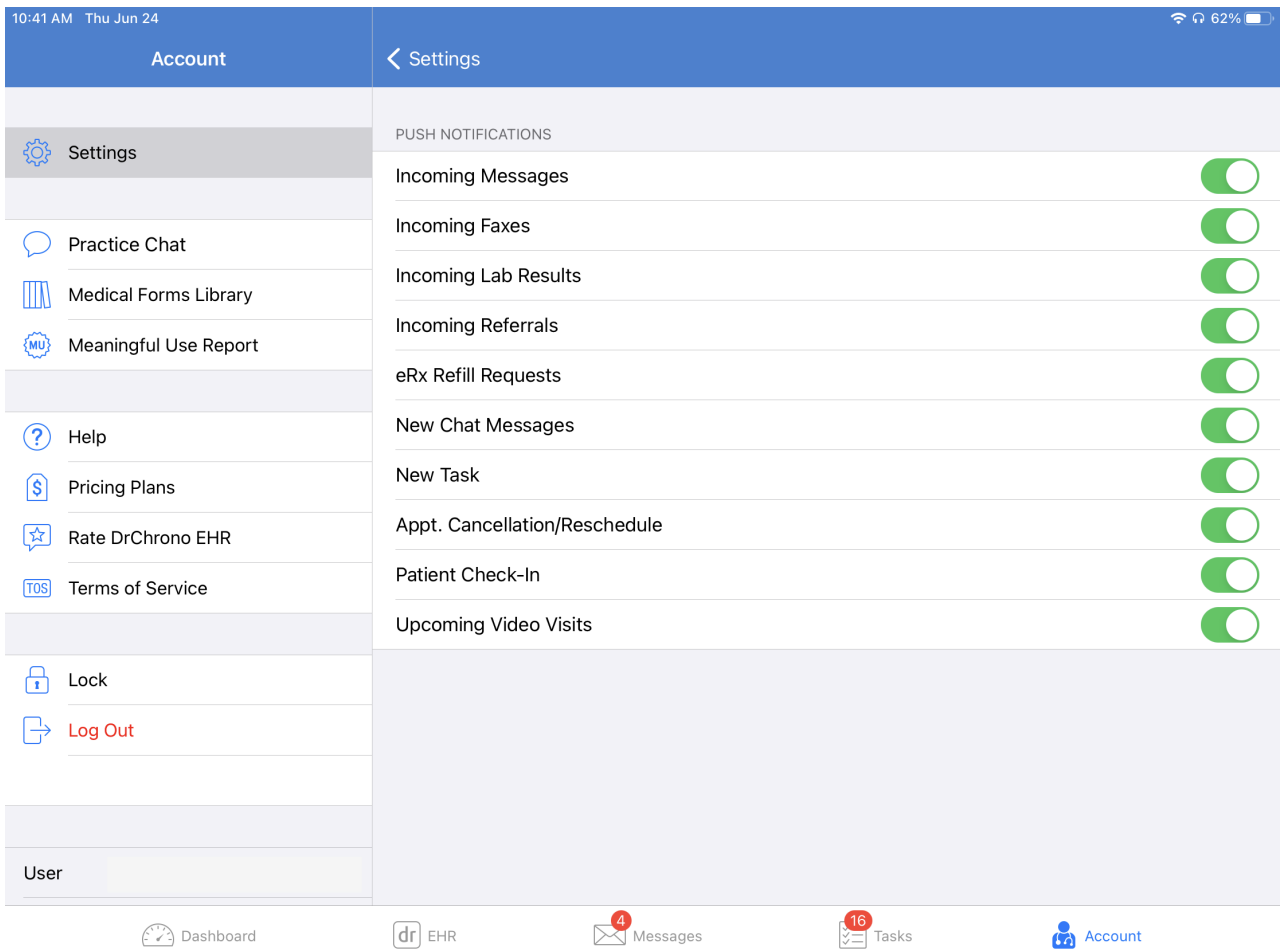

3. Select the notifications you would like to receive by turning the notifications on or off with the switches (

/

).

Note: You may need to enable push notifications on your iPad. To enable the notifications, go to **Settings**.

Scroll down and select **DrChrono EHR** app. Tap **Notifications** and turn on the switch (

) to enable **Notifications**.
