

Account Permissions Overview

Last modified on 05/13/2026 4:33 pm EDT

A | B | C | D | E | M | P | S | U | V

DrChrono has permissions that can grant or restrict access to different areas of the system. Permissions and their descriptions are listed on the **Permissions** tab of the **Permissions Administration** page (**Account > Staff Permissions > Permissions** tab).

When the permission is disabled, you typically see a “permission denied” message if you try to access a page or feature you’re not authorized to use.

Access All Messages for Practice Group

Turned On	Turned Off
View and manage messages and tasks for all providers in the practice group.	<ul style="list-style-type: none">Providers can only view and manage their own and assigned messages and tasks.Staff can only view and manage messages for their associated primary provider selected on the Edit Office Staff page (Account > Staff Members > Staff tab > select Edit > Primary Provider dropdown).

The practice group (PG) level setting (**Share Communications > Share among all providers in the PG**) must be turned on for the **Access All Messages for Practice Group** user permission to allow message sharing.

The DrChrono Support team manages PG settings. [Create a support case](#) to have the **Share Communications** PG setting turned on or off.

- If the PG setting is turned off (**Share Communications > Do not share communication data**), message sharing is turned off for the practice group regardless of the user’s permission.
- If the PG setting is turned on (**Share Communications > Share among all providers in the PG**), the user setting dictates whether that user can see messages for the entire practice or just for themselves (plus their primary provider in the case of a staff user).
 - The staff member's unread message count is tied to their primary provider’s access.
 - If the primary provider has access to all messages, and the staff member doesn’t, the staff member still sees the primary provider’s message count.

Scenarios

User	Share Among All Providers in the PG (PG Setting)	Access All Messages for Practice Group (User Permission)	Message Visibility and Count
Provider	On	On	All messages and tasks in Message Center

User	Share Among All Providers in the PG (PG Setting)	Access All Messages for Practice Group (User Permission)	Message Visibility and Count
Staff	On	On	All messages and tasks in Message Center
Provider	On	Off	Own + assigned messages and tasks
Staff	On	Off	Own + assigned + primary provider's messages and tasks
Provider	Off	On	Own + assigned messages and tasks
Staff	Off	On	Own + assigned + primary provider's messages and tasks
Provider	Off	Off	Own + assigned messages and tasks
Staff	Off	Off	Own + assigned + primary provider's messages and tasks

Manage authorized apps in the App Directory .	Can't manage authorized apps in the App Directory .

Manage Care Plans

Turned On	Turned Off
Create and edit care plans.	View care plans.

Manage Care Plans and Show Care Plans permissions logic

The **Manage Care Plans** permission setting overrides the **Show Care Plans** setting. If **Manage Care Plans** = on, you can view and edit care plans regardless of the **Show Care Plans** permission setting.

- **Manage Care Plans** = on
 - Create or edit care plans.
- **Manage Care Plans** = off and **Show Care Plans** = on
 - View care plans
- Both permissions = off
 - Care Plans sections and fields are hidden
