# How to Submit a Voided Claim to a Payer?
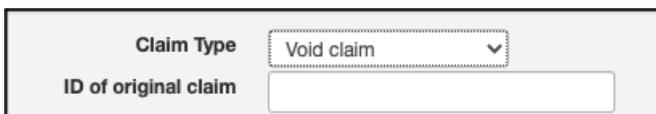

Last modified on 03/19/2026 11:18 am EDT

There may be an instance where you need to delete a claim that has already been submitted to a patient's insurance. To do so, you will need to send the payer a **voided claim**.

1. Navigate to the appointment through the Live Claims Feed. **Billing > Live Claims Feed**

2. Select the patient appointment for which you would like to submit a voided claim

3. From the appointment screen, navigate to the top right column, select the drop-down next to **Claim Type,** and select **Void Claim.**
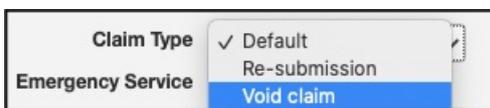

4. If the claim has received payment, the ID of the original claim should populate. If it doesn't, you can type it into the box that appears after you   select **Void Claim**.

5. You can also add additional information to box 19 on the HCFA-1500 by using the **EDI Billing Note** option at the end of the same column within the patient's appointment. This will give the payer additional information on why the claim is being voided.

6. Select **Bill Insurance** as the billing status in the top left column (if it isn't already chosen)

7. Check **Resubmit Claim** and select **Verify & Save**

Additional Notes

If payment has been released, the payer may retract it on a future invoice or request a check directly from you. Each payer can handle the situation differently.

If no payment has been released and the claim was applied to the patient's deductible, for example, the payer will reverse the entry in their system.

Here is a link to a video that will walk you through submitting a void claim to a payer.
