

Square Hardware Compatible with DrChrono

Last modified on 03/10/2025 9:00 am EDT

DrChrono's integration with Square is an easy way for you to process credit card payments from your patients. While Square offers several hardware solutions, not all are compatible with DrChrono's integration.

The following Square hardware solutions are currently compatible with DrChrono through the iPhone or iPad application:

1. [Square Reader for magstripe \(with headset jack\)](#)
2. [Square Reader for magstripe \(with Lightning connector\)](#)
3. [Square Reader for contactless and chip](#)
4. [The Square Stand](#)

Please get in touch with [Square](#) with any hardware questions.

Note: Square transactions processed on DrChrono's web application must be entered manually. Square hardware is limited to the iPhone and iPad DrChrono applications.
