5. Launching the video visit for the provider

The provider can click on the **Start Video Visit** button to launch the telehealth visit. When the browser asks for permission to use your Camera and Microphone, check to **Remember this decision** and click on **Allow**. Without access to your camera and microphone, you will not be able to have a video visit. Here are browser-specific details, if needed, for [Chrome](#), [Safari](#), [Firefox](#), and [Microsoft Edge](#).

There will be a message that says "Waiting for the patient to join". Once the patient has joined, the provider will see the patient in the main part of the screen.

6. Launching the video visit for the patient

There are 2 options for the patient to launch a video visit using the meeting link in the email or through OnPatient if OnPatient access is enabled for the patient.

Option 1 - Using the meeting link

The patient clicks on the link to launch the video visit.

Dear Patient Telemed,

This is an email confirmation for your appointment with **DrChrono Telehealth**.

Option 2 - Connecting through OnPatient

The patient simply clicks on the **Start Video Visit** button once they have logged in to their portal.

The patient will be prompted to allow access to their camera and microphone similar to the provider. Once that is complete, they will see a message that says "Waiting for the provider to join." When the provider has joined, the patient will see the provider in the main part of the screen.

7. Ending the Visit

Upon completion of the visit, the patient or provider can click the red phone icon to end the telehealth visit.

Tips on Telehealth Visits

From time to time, there may be issues with the patient's video connection. For example, if their video connection is not enabled, their screen will appear "blank" and you will be unable to see them. In cases like this, it's possible that the camera on the patient side is either not set up properly or the browser doesn't have permission.

Since we do not have access to the patient's device, some questions to ask to help troubleshoot are:

- Do you have a Webcam on your device?
- Do you have it set up correctly to have video calls?
 - [Instructions for Chrome](#)
 - [Instructions for Safari](#)
 - [Instructions for Firefox](#)
 - [Instructions for Microsoft Edge](#)

- Which browser do you use?
 - Did you give permission to the browser to access the Camera & Microphone?
 - If the patient is using a computer, are they able to join instead on a mobile device?
Sometimes a mobile device is easier to join video visits with.
