

Add a Patient's Address to the Appointment Window on the iPad

07/08/2024 7:31 pm EDT

We have created a way to allow providers to see a glance to identify the address of a patient in the Appointment Detail View. You can enable this feature on the iPad by following the steps below.

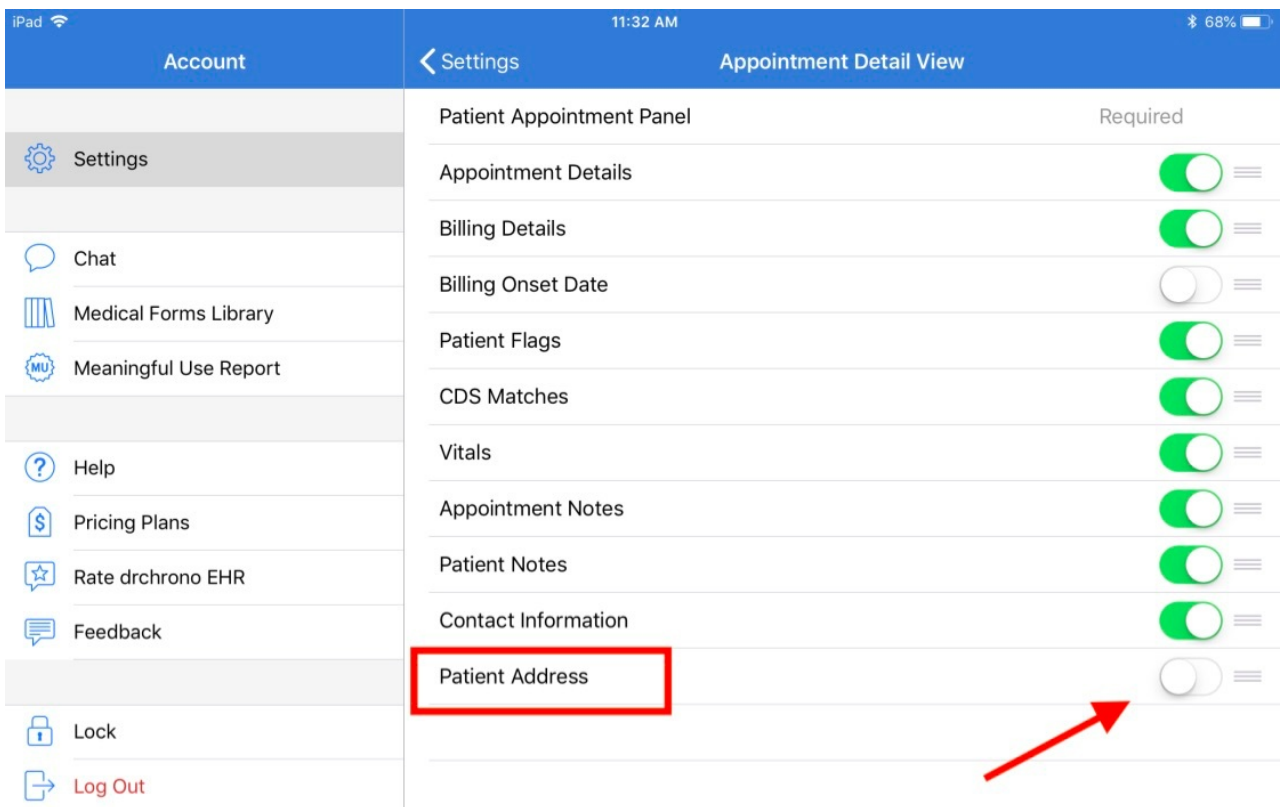

1. Tap More option in the bottom toolbar and select Account Settings.

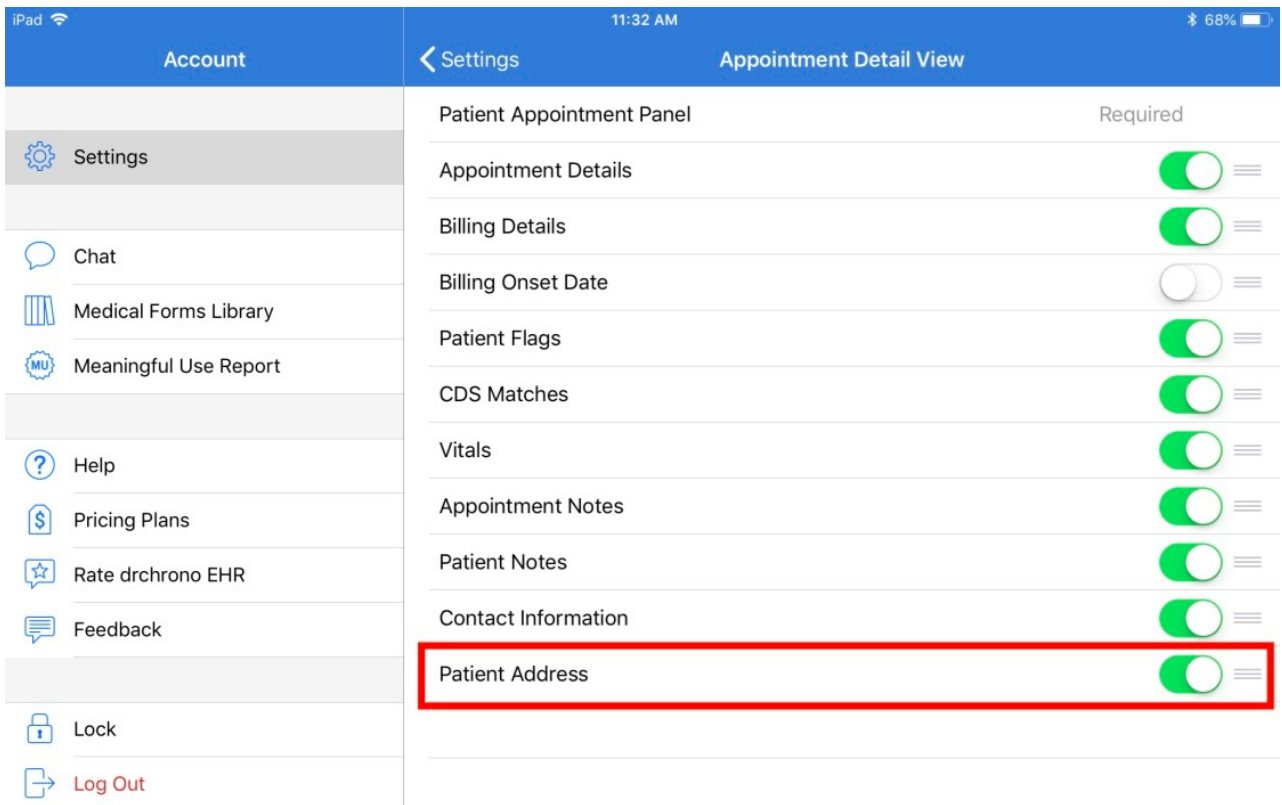

2. Select Appointment Detail View Settings.

3. Find **Patient Address** and turn the switch to green to enable this feature.

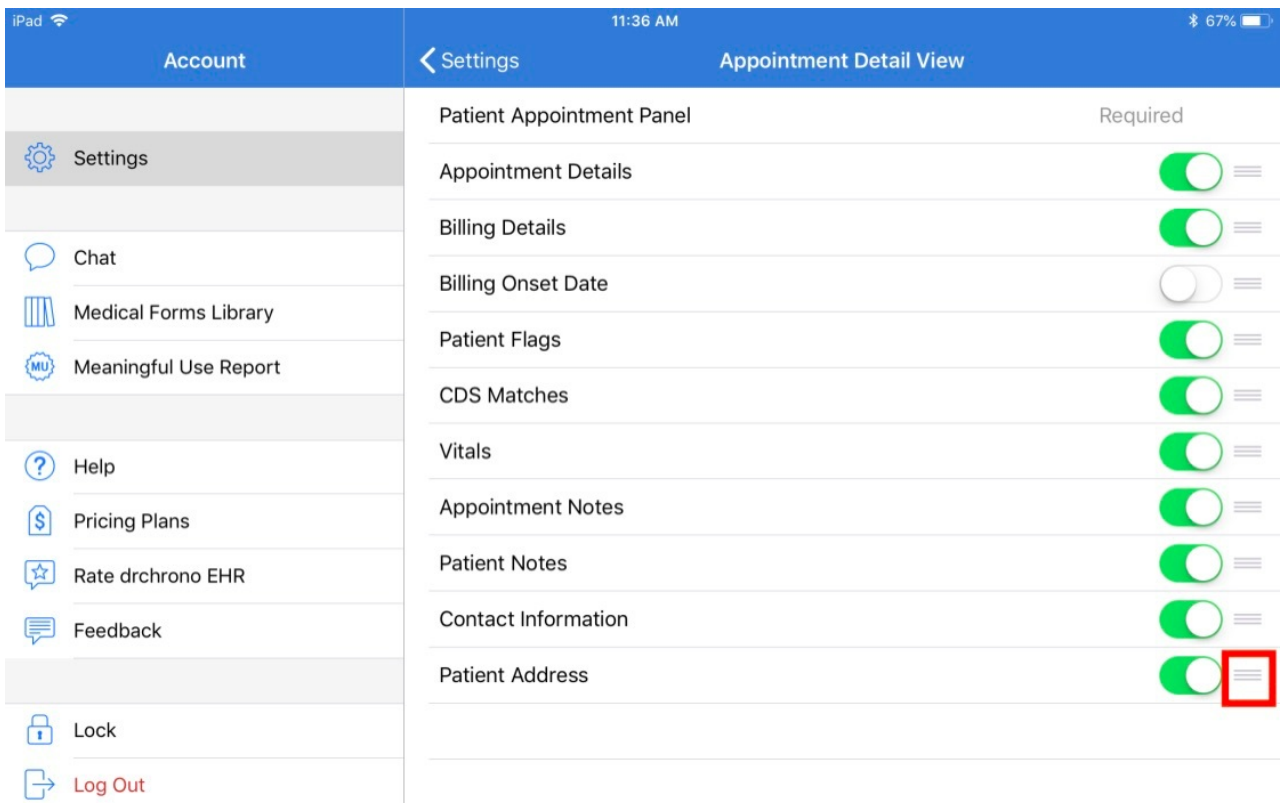

If you would like the Patient Address section to be viewed at the top of the appointment window, press and hold down the three stacked lines (

) and drag it to the top. This will allow you to view the patient's address at the top of the appointment window screen instead of scrolling through the appointment window to find it.

Select an appointment, you will now be able to view the patient's address at the top of the appointment window.

If the address is valid, it will allow you to tap on it and open that address in the Apple Maps app. You can also press and hold the address to generate a drop-down menu giving you the ability to choose which action you would like to take.
