

Deleting a payment in the Patient Payments system

Last modified on 02/25/2025 1:31 pm EST

If there is an error in a payment posted, best practice is to counter-post a correction that will keep a record of the error and subsequent correction instead of deleting the payment, which will remove all records of it. ([How to enter a correction](#))

If you would like to delete the entries outright, you can delete payments that were entered in error. To do so, you'll need the **Billing Administrator** and **Access Patient Payments** permissions enabled for your login. Only those with Billing Administrator privileges will be able to completely delete payments.

If you are a practice admin, make sure you have these permissions checked off for any Staff Members who will need to delete payments in totality. ([How to set Staff Permissions](#))

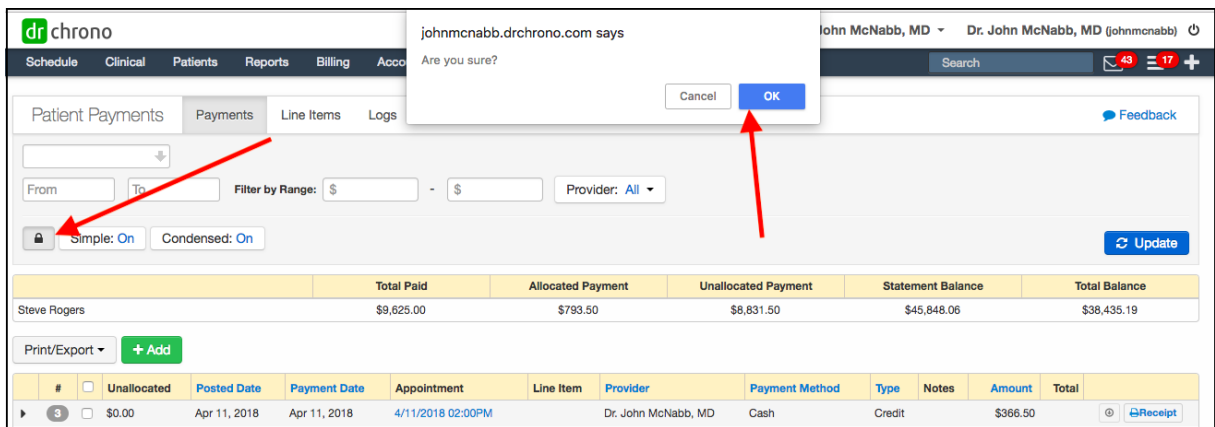

1. With "Billing Administrator" and "Access Patient Payments" enabled, go to **Billing > Patient Payments**

2. Press on the **Payments** tab in the top left corner, then search for the patient you need and click **Update** on the right side of the screen.

- You can then press the **Lock Icon** on the left side of the screen to enter **Unlock Mode**. You'll get a pop-up asking **Are you sure?** to which you can reply **OK**. This will "unlock" the screen, allowing you to delete the payment.

- Once in unlock mode, you can identify the payment which needs to be deleted, and press the **red X** icon to the right of that payment. The system will ask you to confirm the deletion, and after doing so, the payment will be deleted.
