Disabling Your Top/Home Button with Guided Access

07/08/2024 7:32 pm EDT

To use the Kiosk Mode within the DrChrono Check-In app where the iPad is placed in a kiosk stand intended for patient self-check-in.

To enable Guided Access, open your iPad system settings. On your settings page, select the Accessibility tab.

To activate Guided Access, open the DrChrono Check-In app and rapidly press the top or home button three times and tap Start in the top right hand corner. Now the home/top button will be disabled until you triple-tap your home/top button once again and enter the passcode you set up in the previous step or use Touch ID or Face ID to unlock.
