

Run a Meaningful Use Report on the iPad

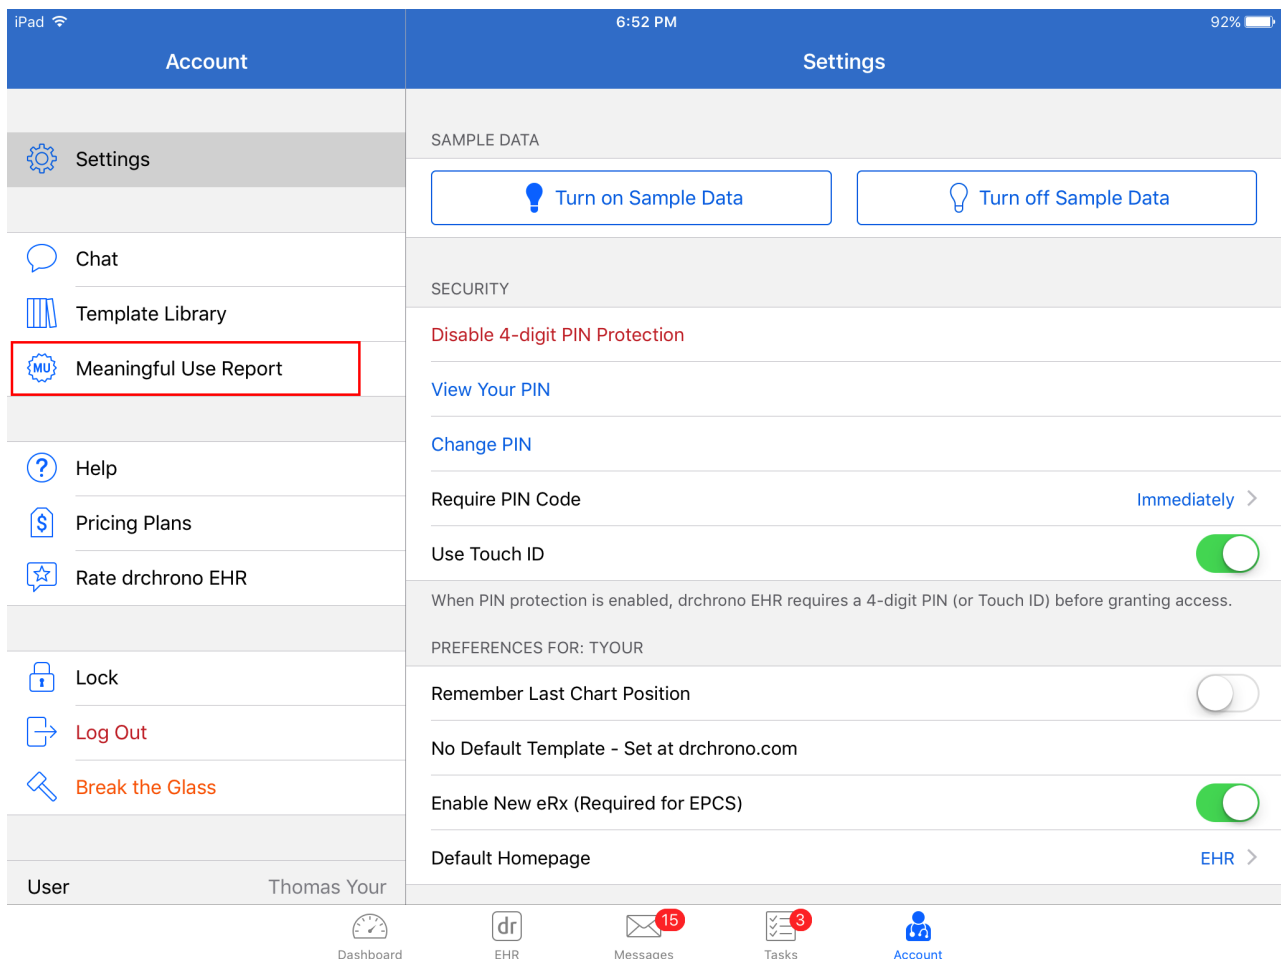

07/08/2024 7:33 pm EDT

In the [EHR/EMR app](#), you can run a Meaningful Use report like you can on the web browser edition of DrChrono. However, on the mobile app, you cannot export your report to a spreadsheet file.

Your mobile application's Meaningful Use reporting tool is located within the 'Account' page on your navigation bar.

Within the account page, select the **Meaningful Use Report** on your left-hand navigation.

Just like your web-based EHR, your mobile EHR's Meaningful Use report. Enter your date range to view your Meaningful Use progress for both Stage 1 and Stage 2.
