- If you're on our paid plan, contact our Customer Support team via chat within the app, via email at support@drchrono.com, or give us a call at (844) 569-8628.
- If you're still in implementation, check with your implementation specialist. You can also check with your account manager.
- You can use a basic CSV file with custom category information.
- Include a header row that defines what data is in each column. All fields are required.
- The header fields should cover columns A–J. They're split out for easier viewing.
