

Setting up Favorite Prescriptions

07/08/2024 7:39 pm EDT

Setting up your favorite prescriptions is easy to do in DrChrono and can save you time when e-prescribing. There are two ways to save prescriptions to your favorites: you can save them as you create prescriptions from the **Send eRx** screen or you can set them up in the **eRx Settings** menu.

Saving Favorite Prescriptions in Send eRx

To add a prescription to your favorites while in the process of prescribing, check the **Add to Favorites** box when you have completed the prescription.

The screenshot shows the 'New Prescription' form. On the left sidebar, 'Send eRx' is highlighted in green. The main form has a 'Medication' section with a dropdown menu set to 'Favorite medications'. Below this, the medication is 'amoxicillin 500 mg oral capsule'. The 'SIG*' field contains '2 a day for 10 days'. The 'Dispense*' field is '20' and the 'Dispense Unit*' is 'Capsule'. The 'DAW' field is 'No' and 'Refills' is '0'. At the bottom of the form, the 'Add to Favorites' checkbox is checked and highlighted with a black arrow. Other checkboxes include 'Add to Medication List'. There are also buttons for 'N/A: U', 'Generic', and 'RX'.

Next, click **Preview Prescription**.

The screenshot shows the 'Select Pharmacy' screen. At the top, there is a search bar with 'Name / Location / Phone / NCPDP ID' and a search icon. Below the search bar, there are buttons for 'Show Favorites' and 'Patient's Default'. On the right, there are tabs for 'Mail Order', 'Retail', 'Other', and 'Proximity'. The 'WALGREENS #07080' pharmacy is selected, and its details are shown: '105 E EL CAMINO REAL, SUNNYVALE, CA 940871937', '+1.408.991.9013', 'Fax: +1.408.991.9025', and 'Retail'. There are checkboxes for 'Add to Favorites' and 'Set as Patient Default'. At the bottom right, there is a blue 'Preview Prescription' button.

When you select **Send Prescription**, it will save to your favorite prescriptions.

The screenshot shows the prescription summary screen. At the top, there are buttons for 'Edit Prescription' and 'Start over'. Below this, there is a 'Prescription Summary' section. At the bottom right, there are buttons for 'Print Prescription', 'Fax Prescription', and 'Send Prescription'. The 'Send Prescription' button is highlighted with a black arrow.

Saving Favorite Prescriptions in eRx Settings

Go to **Account > eRx Settings**.

eRx Settings

Under the **Favorite Prescriptions** tab, you can manage all of your existing favorite prescriptions and add new ones.

Click the (

) and select **medication**.

eRx settings

The screenshot shows the 'eRx settings' page with the 'Favorite Prescriptions' tab selected. There are three medication cards displayed:

- acetaminophen 160 mg or...**: 1 capsule once a day, Dispense: 30, Refills: 0. Buttons: Medication, Substitutions allowed.
- acetaminophen-codeine 1...**: 60 milliliter(s) oral 3 times a day with meals x3 doses, Dispense: 43.0, Refills: 0. Buttons: Medication, Substitutions allowed.
- Alpha Lipoic 300 mg**: 1 tab 1x a day, Dispense: 30.0, Refills: 1. Buttons: Medication, Substitutions allowed.

A dropdown menu is open over the third card, showing options: Medication (selected), Compound medication, and Supply medication. A green plus sign icon with an arrow points to it.

Enter the information and click **Save**.
