

Documentation of Current Medications in the Medical Record eCQM CMS68v11

07/08/2024 7:42 pm EDT

Description

Percentage of visits for patients aged 18 years and older for which the eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter.

Guidance

This eCQM is an episode-based measure. An episode is defined as each eligible encounter during the measurement period. This measure is to be reported for every encounter during the measurement period.

Eligible clinicians reporting this measure may document medication information received from the patient, authorized representative(s), caregiver(s), or other available healthcare resources.

By reporting the action described in this measure, the provider attests to having documented a list of current medications utilizing all immediate resources available at the time of the encounter.

This list must include all known prescriptions, over-the-counter (OTC) products, herbals, vitamins, minerals, dietary (nutritional) supplements, and cannabis/cannabidiol products AND must contain the medications' name, dosage, frequency, and route of administration.

This measure should also be reported if the eligible clinician documented the patient is not currently taking any medications.

This version of the eCQM uses QDM version 5.6. Please refer to the eCQI resource center (<https://ecqi.healthit.gov/qdm>) for more information on the QDM.

Initial Population

All visits occurred during the 12-month measurement period for patients aged 18 years and older.

Date of birth information can be entered in DrChrono in the patient chart under the **Demographics** tab with the **Patient's Date of Birth**.

Denominator Exclusions

None

Denominator Exceptions

Documentation of a medical reason(s) for not documenting, updating, or reviewing the patient's current medications list (e.g., the patient is in an urgent or emergent medical situation where time is of the essence and delay treatment would jeopardize the patient's health status).

Numerator

Eligible clinician attests to documenting, updating, or reviewing the patient's current medications using all immediate resources available on the date of the encounter.

The SNOMEDCT code **428191000124101** can be added to the patient's chart under the **Intervention** tab of the CQMs section. **Click +New.**
