

Exporting QRDA I Files from DrChrono

07/08/2024 7:44 pm EDT

You may need to export a QRDA I file to provide specific evidence for a particular patient. Or you may need to export your Clinical Quality Measure data for all the measures available in DrChrono or specific ones.

This article will show you how to export QRDA I files by [measure\(s\)](#) and by [patient](#).

Exporting a QRDA by Measure(s)

Go to [Clinical](#) > [Clinical Quality Measures](#).

On the main page, select the reporting year or date range for your export.

Clinical Quality Measures

Reporting Year: 2022 | 01/01/2022 | 12/31/2022

[Calculate Selected](#) | [QRDA I Import](#) | Organization CCN (Optional) | [Export QRDA I](#) | [Export QRDA III](#) | [Export CSV](#)

<input type="checkbox"/>	CMS eCQM ID	MIPS Quality ID	Measure Name	Measure Description	Num / Numex / Dem / Excl / Excp	Calculate
<input type="checkbox"/>	CMS2v11	134	Preventive Care and Screening: Screening for Depression and Follow-Up Plan	Percentage of patients aged 12 years and older screened for depression on the date of the encounter or up to 14 days prior to the date of the encounter using an ageappropriate standardized depression screening tool AND if positive, a follow-up plan is documented on the date of the eligible encounter		Calculate
<input type="checkbox"/>	CMS50v10	374	Closing the Referral Loop: Receipt of Specialist Report	Percentage of patients with referrals, regardless of age, for which the referring provider receives a report from the provider to whom the patient was referred		Calculate
<input type="checkbox"/>	CMS68v11	130	Documentation of Current Medications in the Medical Record	Percentage of visits for patients aged 18 years and older for which the eligible professional or eligible clinician attests to documenting a list of current medications using all immediate resources available on the date of the encounter		Calculate
<input type="checkbox"/>	CMS69v10	128	Preventive Care and Screening: Body Mass Index (BMI) Screening and Follow-Up Plan	Percentage of patients aged 18 years and older with a BMI documented during the current encounter or within the previous twelve months AND who had a follow-up plan documented if most recent BMI was outside of normal parameters		Calculate
<input type="checkbox"/>	CMS90v11	377	Functional Status Assessments for Heart Failure	Percentage of patients 18 years of age and older with heart failure who completed initial and follow-up patient-reported functional status assessments		Calculate
<input type="checkbox"/>	CMS122v10	001	Diabetes: Hemoglobin A1c (HbA1c) Poor Control (> 9%)	Percentage of patients 18-75 years of age with diabetes who had hemoglobin A1c > 9.0% during the measurement period		Calculate
<input type="checkbox"/>	CMS130v10	113	Colorectal Cancer Screening	Percentage of adults 50-75 years of age who had appropriate screening for colorectal cancer		Calculate

Next, select the measure or measures you would like to include in your export. Click [Calculate Selected](#) or [Calculate](#) next to the individual measure to view the data associated with the measure.

Exporting a QRDA I for an Individual Patient

The QRDA I export process for an individual patient is straightforward.

1. Go to **Patients > Patient List** and select the patient or search for the patient you need.

2. Select **CQMs** from the left navigation panel, Next, click **Download QRDA I**.

3. Save the QRDA I XML file based on your computer's settings.
