# My printed HCFA form is not aligned.

Last modified on 09/08/2025 10:52 am EDT

In DrChrono, you may fill out HCFA-1500 forms by printing your claim information directly onto the blank HCFA form utilizing the HCFA-1500 (text) option. **The option in DrChrono is only configured to work with the most recent HCFA-1500 version.**

If the text does not align with the fields on the form, **please check if your printer and/or browser has the 'Fit to page' option disabled.**

In Google Chrome, the 'Fit to page' option is on the left-hand print settings pane that opens after you select the 'Print' button.

Make sure **Fit to page** is unchecked, and your HCFA-1500 alignment should be resolved. If not, please check to make sure your print is configured to print on 8.5" x 11" letter-size paper.
