Port Your Fax Number from DrChrono to Another Vendor

Last modified on 11/21/2025 3:00 pm EST

To port your fax number from DrChrono to another EHR or fax vendor, you'll need to coordinate with your new EHR or fax vendor to initiate this process. Typically, your new vendor will request specific details about your existing fax number.

To get started, create a support case and include a copy of your W9. Once received, the Support representative will supply you with the necessary information to share with your new provider to complete the porting request.

You can find your fax number in the **Message Center** (select in the navigation menu).
