## Prescribing via the DrChrono EHR iPad App

07/08/2024 7:47 pm EDT

You can prescribe medications electronically through the app. To do so, you'll need to have eRx set up. If you haven't done that yet, please visit our guide located here.

## **Creating a New Prescription**

To create a new prescription, enter the EHR through the navigation bar on your iPad. Then, navigate to a patient's chart.

Once you're at a patient's chart, tap on their name to reveal a drop-down menu. You want to select **Send eRx**. This will bring you to the new eRx page.
