

How to Filter a Claim by the Billing Status

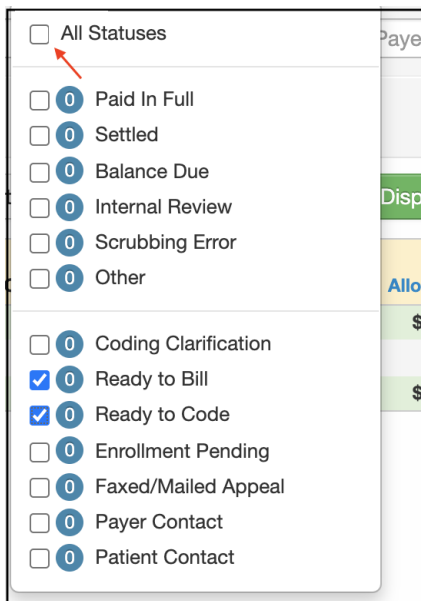

Last modified on 11/22/2024 11:16 am EST

While working on claims, it is often helpful to sort claims by billing status to work like claims with like claims. Here is how you can easily do that in your Live Claims Feed:

1. Hover over the **Billing** tab and select **Live Claims Feed**.
2. Select the **Billing Status** drop-down.

3. All statuses will be selected as a default. Uncheck the **All Statuses** at the top and check the box next to the status you would like to view. You can choose a single status or multiple.

4. Ensure that the date range reflects the claims you want to see. By default, the system will show the previous 30 days. However, you can update the range to show a larger (or smaller) period.
