eProvider Solutions- How do I cancel an enrollment request?

Last modified on 09/28/2026 2:00 pm EDT

If you've entered an enrollment request with ePS and need to cancel it, you can from the **Continue Unsubmitted** tab. Simply press on the **Cancel** button under Actions and it will be removed from your list.

To review the enrollment requests that have been canceled on your account, you can see them by using the status filter. Select **Canceled** and press **Search**. Any canceled requests will be displayed.

There is an option to resurrect the request by pressing **Continue**, but it will bring you back to the beginning to submit the request from the beginning.
