DrChrono System Requirements

Last modified on 10/21/2026 4:44 pm EDT

Supported browsers | Computer requirements | Mobile device requirements

Before you start using DrChrono EHR, make sure your computer, browser, and mobile devices meet the minimum requirements below. Using a supported setup helps pages load correctly and keeps features like telehealth visits running smoothly.

Supported browsers

DrChrono EHR works on the latest versions of these browsers:

- Apple Safari
- Google Chrome
- Microsoft Edge
- Mozilla Firefox

Keep your browser up to date. To learn how, refer to Update Your Web Browser to the Latest Version.

Computer requirements

DrChrono EHR supports Windows and Mac computers. Your computer must run one of these operating systems and meet that operating system's minimum hardware requirements.

Operating System	Minimum Version
Windows	Windows 10 or later
MacOS	macOS 13.5 or later and a Mac with Apple M1 chip or later

Mobile device requirements

DrChrono mobile apps work on most, but not all, iPads and iPhones. To check your device, refer to Compatible iOS Versions and Devices Supported by DrChrono.

Download the apps from the App Store.

App	Who Uses It
DrChrono EHR/EMR	Providers and staff
DrChrono Patient Check-In	Patients checking in at your office
DrChrono OnPatient Portal	Patients
