

Adding Medications to the Patient Medication List on the iPad

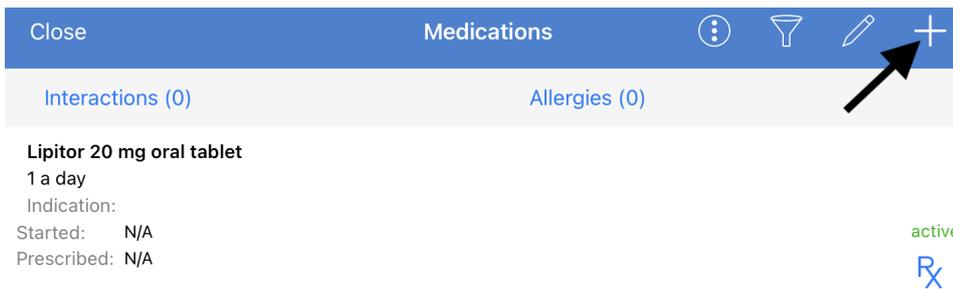

Last modified on 06/12/2025 1:19 pm EDT

You can quickly and easily add medications to a patient's chart on the iPad EHR. This article will guide you through the process.

Medications can be accessed through a few places in the app, but the quickest way is to tap on the patient's name and select **Medications**.

Here you can view all the current medications in a patient's chart. Tap the () icon to add a new medication.

Enter the medication name in the search field. The results will display the medications by dosage from the Surescripts database. Tap on the medication to select it.
