# C-CDA Files and DrChrono

09/03/2024 5:11 pm EDT

DrChrono allows for C-CDA exports and imports of information. We offer bulk imports of C-CDA files on paid plans.

To learn more about what C-CDA is check out CMS's page on C-CDA files.

**Importing**

1. Go to **Patients** > **Patient List**.

2. Click **Update patient (via C-CDA XML)** button.

3. Choose the C-CDA file you wish to upload and select **Preview**. The file will process automatically.

Exporting

1. Go to **Patients** > **Patient List**.

Note: users can also complete a mass export by Patient Group, including Inactive and Deceased.

2. Click the **Export (C-CDA XML**) button.
3. This will send the file to your Message Center. This can take a few minutes for the system to generate but once it's ready click on the Message Center (

) icon to access the C-CDA file.

4. Select the C-CDA message and click **Download Document**.
