

Query of Prescription Drug Monitoring Program (PDMP) Bonus

07/08/2024 7:52 pm EDT

You can attest to the use of Query of a Prescription Drug Monitoring Program measure in your Healthmonix MIPSpro account.

If you participate in a Prescription Drug Monitoring Program (PDMP) you can earn a bonus towards your total PI score. In DrChrono, if you utilize our partner [Bamboo Health \(formerly Appriss Health\)](#) and have electronically prescribed at least one schedule II opioid and used our Appriss Health integration to conduct a PDMP query, you could qualify for the bonus.

Description

For at least one Schedule II opioid electronically prescribed using CEHRT during the performance period, the MIPS-eligible clinician uses data from CEHRT to conduct a query of a PDMP for prescription drug history, except where prohibited and by applicable law.

In your Healthmonix MIPSpro PI dashboard, you can attest by selecting **Yes** or **No** and clicking **Save**.

Query of Prescription Drug Monitoring Program (PDMP) (PI_EP_2)

Complete:

1. Was at least one Schedule II opioid electronically prescribed using CEHRT during the performance period, where the MIPS eligible clinician used data from CEHRT to conduct a query of a PDMP for prescription drug history, except where prohibited and in accordance with applicable law?

Yes No

Measure Details

Measure Title: Query of Prescription Drug Monitoring Program (PDMP)

Measure ID: PI_EP_2

Objective: e-Prescribing

Description

For at least one Schedule II opioid electronically prescribed using CEHRT during the performance period, the MIPS eligible clinician uses data from CEHRT to conduct a query of a PDMP for prescription drug history, except where prohibited and in accordance with applicable law?

Definitions

Prescription - The authorization by a MIPS eligible clinician to a pharmacist to dispense a drug that the pharmacist would not dispense to the patient without such authorization.

Permissible Prescriptions - All drugs meeting the current definition of a prescription as the authorization by a clinician to dispense a drug that would not be dispensed without such authorization and may include electronic prescriptions of controlled substances where creation of an electronic prescription for the medication is feasible using CEHRT and where allowable by state and local law.

Opioids - Schedule II controlled substances under 21 CFR 1308.12, as they are recognized as having a high potential for abuse with potential for severe psychological or physical dependence.

PDMP - an electronic database that tracks prescriptions of controlled substances at the State level.
