

# How do I add a supervising signature on the iPhone?

07/08/2024 7:52 pm EDT

On the web EHR, a supervising provider can sign off on a rendering provider's clinical note (Guide found [here](#)). This functionality is also extended to the iPhone EHR app. Supervising signatures on the mobile app works the same way as on the web.

**Note:** The ability to have a supervising provider sign off on a rendering provider's clinical notes must be turned on by the DrChrono team. If you are interested in having this feature turned on, please reach out to your account manager, or implementation specialist or submit a [support ticket](#) and one of our agents will set up the feature for you.

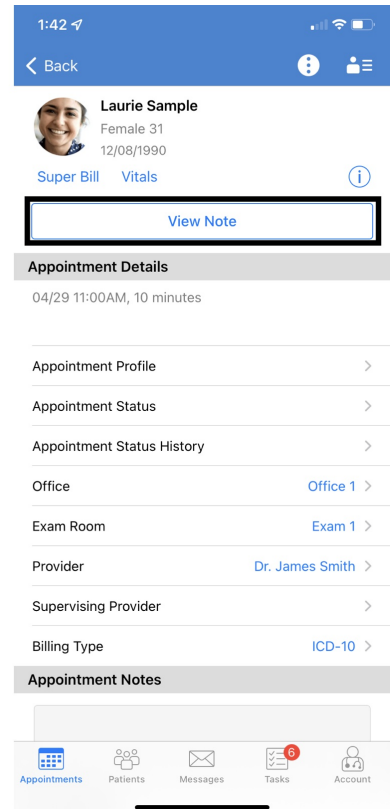

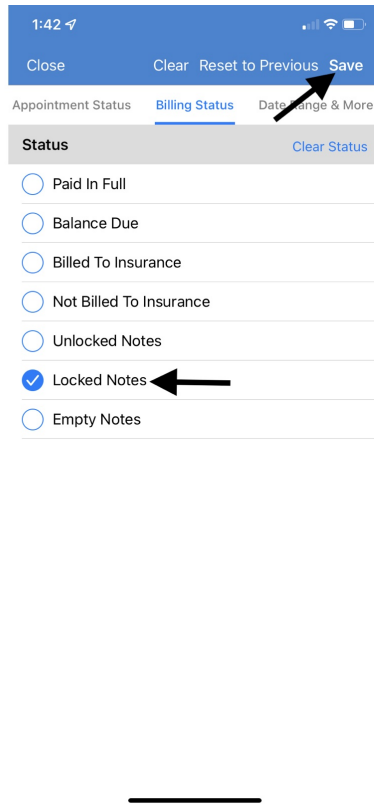

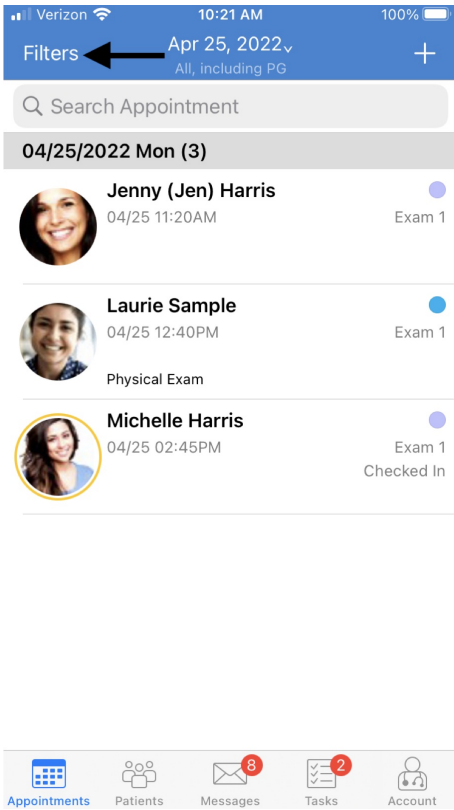

1. First the provider who is being supervised needs to sign and lock their note. This can be completed on the web, iPad, or iPhone.

2. After the clinical note is signed and locked by a rendering provider that is set up as a provider who needs a supervising signature and the account that is accessing the appointment is authorized to be a supervisor, you will see an **Add Supervising Signature** button.

Once the supervising provider has logged in, they can add their signature to the necessary notes.

- Use the filters to find **locked notes** under the **Billing Status** menu
- Select the appointment and tap **View Note**

- Tap **View Clinical Note** after the note loads
- Select **Add Supervisor Signature**
- The rendering and supervising signatures will appear on the note

Test Facility

Patient: Laurie Sample DOB: 12/08/1990 Sex: F
Provider: Dr. James Smith Visit: 04/29/2022 11:00AM Chart: SAJA000001
Primary Payer ID: 87726 Secondary Payer ID:

Medications & Allergies:

Table with 5 columns: Current Medication & Dosage, Dispense, SIG, PRN?, Indication. Rows include Lexapro, Phenibut, Hydrochlorothiazide, amoxicillin, amoxicillin 500 mg oral capsule, cyclobenzaprine, and Alpha Lipic.

Table with 2 columns: Allergy, Reaction. Row: No Known Drug Allergies (NKDA).

Subjective:

History of present illness: Laurie Sample is a 31 years year old female Social History: Laurie Sample responded well to the injectable treatment on 04/29/2022 11:00AM
General [-]: no significant weight change, no weakness, no fatigue, no fever
Skin [-]: no rash, no lumps, no sores, no itching, no dryness, no color change, no changes in hair or nails
HEENT [-]: no headache, no head injury, no dizziness, no lightheadedness, no vision changes, no hearing problems, no hearing, no tinnitus, no vertigo, no earaches, no nasal stuffiness, no nasal discharge, no nosebleeds, no sinus trouble, no dry mouth, no hoarseness
Neck [-]: no lumps, no lymphadenopathy, no goiter, no pain, no stiffness
Breasts [-]: no lumps, no pain or discomfort, no nipple discharge
Cardiovascular [-]: no chest pain or discomfort, no palpitations, no dyspnea, no orthopnea, no paroxysmal nocturnal dyspnea, no edema
Respiratory [-]: no cough, no sputum, no hemoptysis, no dyspnea, no wheezing
GI [-]: no trouble swallowing, no heartburn, no nausea, no vomiting, no diarrhea, no rectal bleeding or tarry stools, no constipation, no abdominal pain, no food intolerance
