Editing a Staff Role for Your Practice Group

Within your practice, different staff members can have different levels of permission. With staff roles, you can easily customize which staff members have access to different permissions within the DrChrono EHR. This guide will teach you how to edit your existing staff roles.

To begin, mouse over the **Account** section in the DrChrono navigation bar and a dropdown menu should appear. Select the **Staff Permissions** option to enter the **Permissions Administration** page.

To edit a new role, select the **Roles** tab on the **Permissions Administration** page. Here you can view a list of active roles that can be applied to your staff members.

To the right of the role, you would like to edit, hit the **Edit** button. Note that you cannot edit default roles.

Providers Staff **Roles** Permissions Permission Grid

Name	Owner	Description	+ Add Role	
Billing Staff	Public	Staff which requires access to only billing information.	View	Delete
Nurse	Public	Nurse / PA that requires supervising signature	View	Delete
Office Manager	Public	Office/Practice Manager manages the office and other staff/doctor accounts	View	Delete
Provider	Public	Provider that has access to the entire system	View	Delete
Staff	Public	Staff that has access to fundamental system tasks.	View	Delete
Intern	Thomas Your	Temporary Interns	Edit	Delete

When you select **Edit**, you may edit permissions by using the checkboxes to select and deselect permissions. If you would like to change the permissions of existing users in this role, make sure that the **Update Users with Role** checkbox is selected. When finished, select the **Save Role** button.
