

# Enabling Appointment Templates in All Calendar Views

07/08/2024 7:53 pm EDT

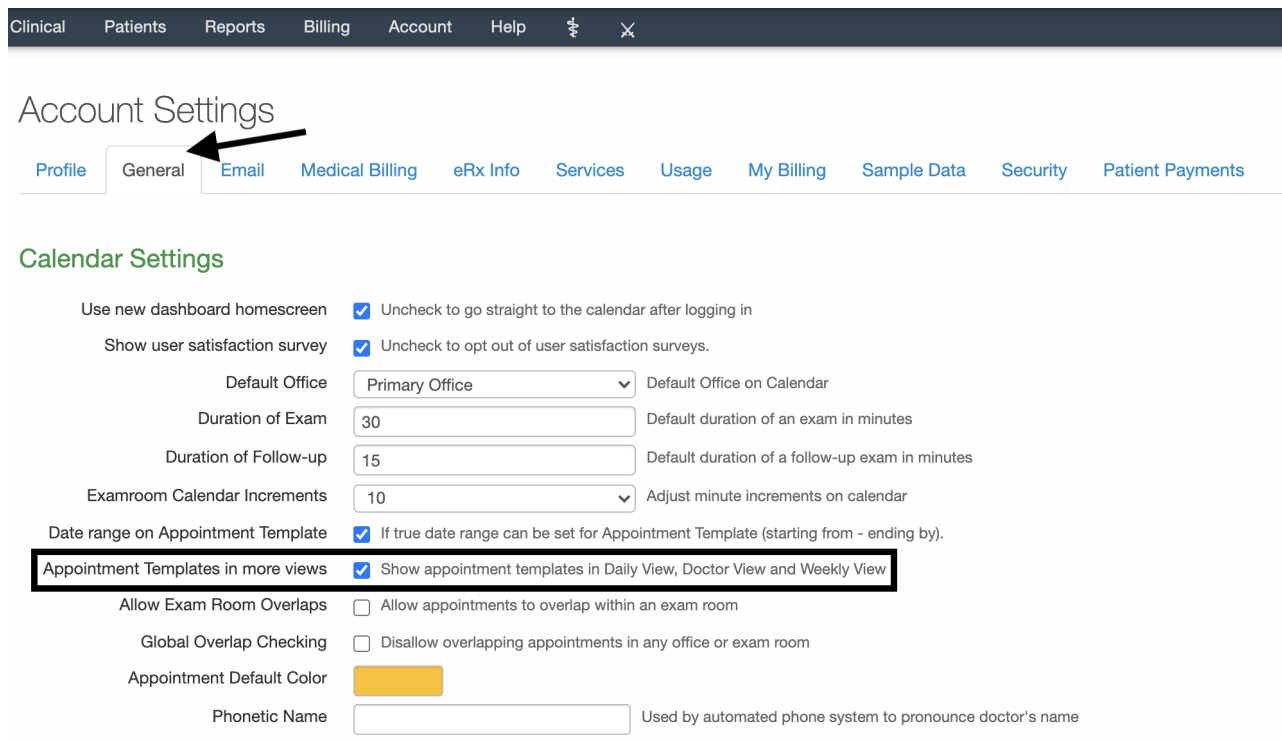

Appointment Templates are not limited to the daily, weekly, and monthly views in your calendar.

You can also use Appointment Templates in the DrChrono Exam Rooms View and Doctor View. This setting is disabled by default. To enable this setting, mouse over the **Account** tab and select **Provider Settings**.

Within Account Settings, select the **General** tab. Under **Calendar Settings** find the **Appointment Templates in More Views** option and check the box to activate this setting.

Scroll down and click **Update Entire Profile** to save your settings.
