

Can I send a message by fax (without attached referrals or documents)?

Last modified on 09/24/2025 2:29 pm EDT

DrChrono doesn't support composing and sending messages by fax. [Faxes must be sent from within the patient chart](#) or referral. However, you can compose a message, upload or scan it into DrChrono as a PDF, and then send the PDF as a fax. You can also [send a referral for a patient](#).

DrChrono's fax system is configured to send faxes associated with a patient. From the patient chart, you can fax:

- Uploaded documents
 - Lab results
 - Demographics
 - Locked clinical notes
 - Signed consent forms
 - Amendments
-
