Insurance Set up Screen for those utilizing ePS clearinghouse

Last modified on 08/12/2026 11:36 am EDT

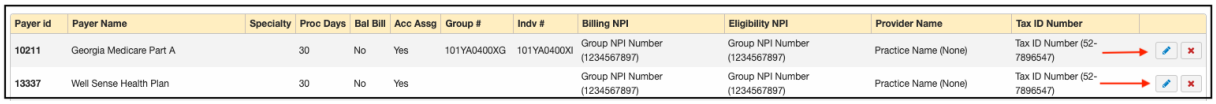

The Insurance Setup screen has multiple functionalities. Depending on how the provider/organization is credentialed, some claims may need to be billed with an individual NPI or SSN while another is billed with the group NPI and TIN. This screen will allow you to set up the provider to bill claims for an individual payer/payers using the information they were credentialed with.

Let's take a look at all of the options the feature offers:

1. Hover over the **Billing** tab and select **Insurance Setup**
2. This screen will allow you to enter information specific to the billing of an individual payer (NPI, Tax ID, Organization Name, etc..) or initiate a new EDI Enrollment by pressing **+ Add Payer**

3. To edit or update any information, press the pencil icon corresponding to the payer.

Payer id	Payer Name	Specialty	Proc Days	Bal Bill	Acc Assg	Group #	Indv #	Billing NPI	Eligibility NPI	Provider Name	Tax ID Number
10211	Georgia Medicare Part A		30	No	Yes	101YA0400XG	101YA0400XI	Group NPI Number (1234567897)	Group NPI Number (1234567897)	Practice Name (None)	Tax ID Number (52-7896547)
13337	Well Sense Health Plan		30	No	Yes			Group NPI Number (1234567897)	Group NPI Number (1234567897)	Practice Name (None)	Tax ID Number (52-7896547)

4. The "Add/Edit Payer" page has a lot of options, please find descriptions for each below:

Billing NPI - If you have two NPIs (Group and Individual), you can switch between the two depending on how you are credentialed with the payer. This will be reflected in HCFA box 33a.

Eligibility NPI - If you get an eligibility error message regarding enrollment, you can switch the NPI depending on how you are credentialed with the payer for eligibility. This will be the NPI that the system uses to check a patient's eligibility and benefits.

Provider name - Select the provider/practice name and this information is reflected in Box 33.

- *Example: Select "Provider Name" if the billing NPI is individual.*

Tax ID number / TIN - Depending on how the provider is credentialed with the payer, you can switch between the billing and the TIN or SSN.

Group Provider # - If the insurance is requesting the group provider number in box 33b*(Shaded column)*, please enter the group provider number in this field and choose the "Group provider number qualifier".

- Example: Indicate whether it is Taxonomy, State License, etc.

Individual Provider # - If the insurance is requesting the individual provider number in box 24j *(Shaded column)*, please enter the individual provider number in this field and choose the "Individualprovider number qualifier".

- Example: Indicate whether it is Taxonomy, State License, etc.

Balance billing - If you are out of network with the payer and would like to bill the patient for any adjustment (sometimes listed as R & C amount), choose "YES". This will transfer the adjustment amount toward the patient column.

Filing limit days - If you know the Timely filing limit for the payers, update in this field. You can retrieve a claim report in the Billing > Live Claims Feed by placing a checkmark on the box **TFL Warning**. This will help ensure that you don't miss out on reimbursement because the claim was not submitted in time.

Accept assignment - If you uncheck this option, the insurance will send the payments directly to the patient and not to the doctor. To send claims with the **accept assignment** designation, please leave the box checked. Please note, that some payers will not send payment directly to the provider, regardless of what is notated on the HCFA, if the provider is out of network.

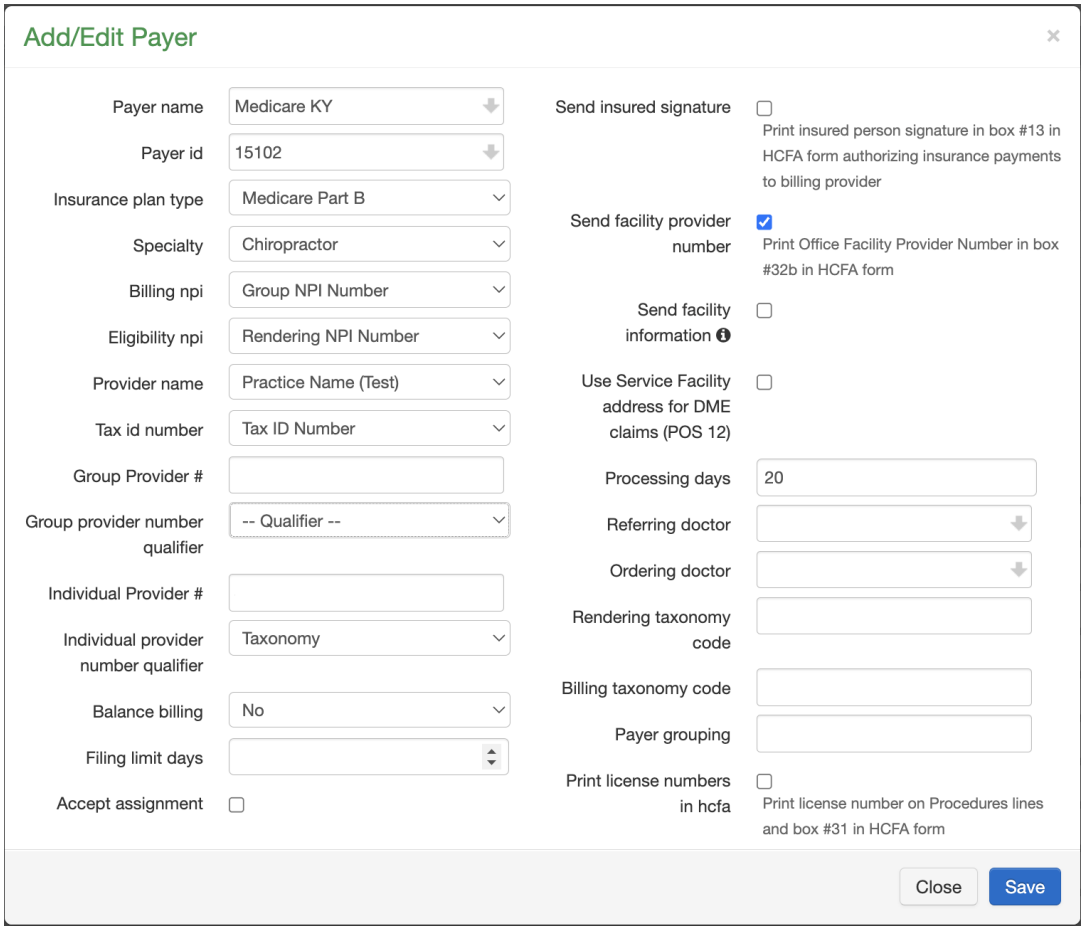

Send facility provider number - This number populates from the Account > Offices > Edit > Billing > Facility Provider Number field. It will reflect in HCFA box 32b *(Shaded field)*.

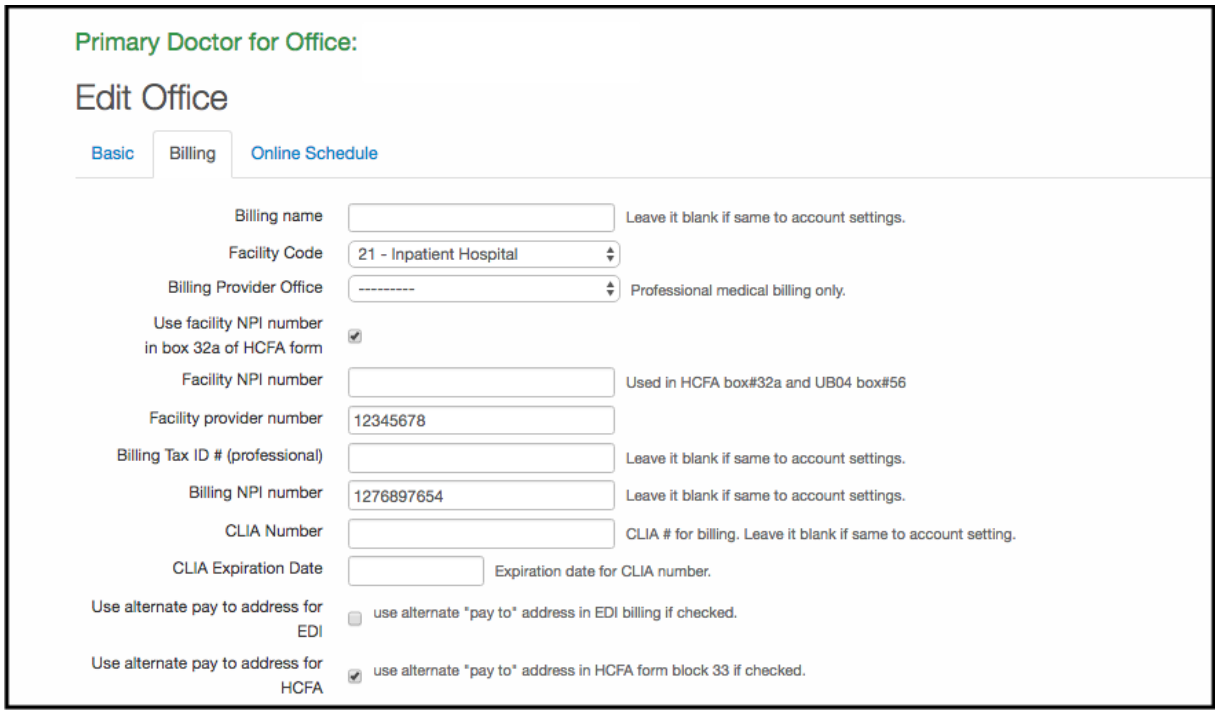

Use Service Facility Address for DME Claims (POS 12) - This setting applies specifically to DME claims billed with Place of Service (POS) 12 (Home).

- When this setting is **enabled for the payer,** and the claim is submitted using the **Durable Medical Equipment (DME)** billing status, the system will send the **service facility address** as the facility address on the claim.
- When this setting is **disabled**, the system will send the **patient's address** as the facility address.

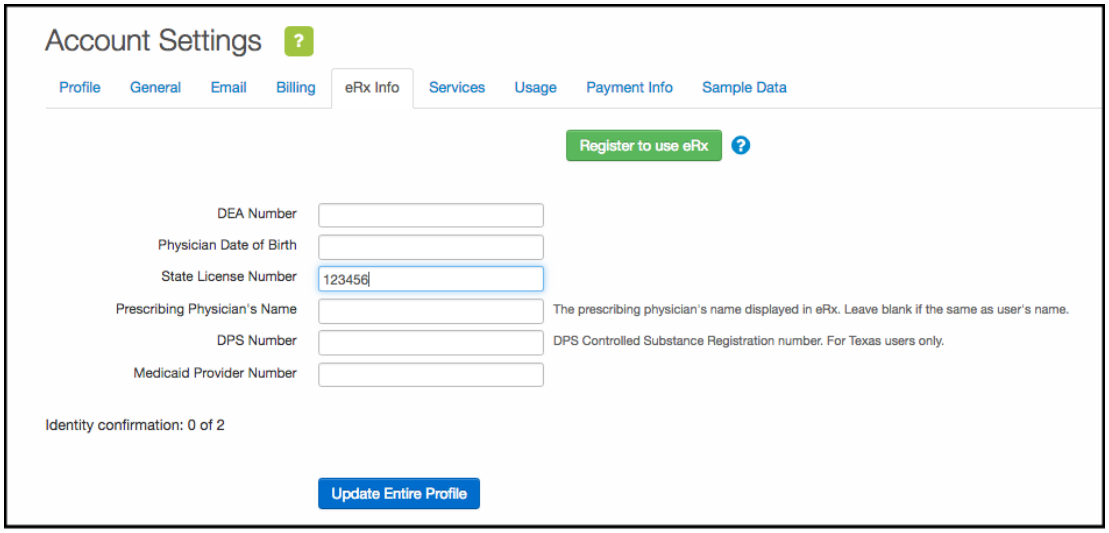

Referring doctor/Ordering doctor - If you want a specific Referring/Ordering provider to reflect all the patients with this particular payer, enter the doctor's name, which will populate in this field. You would first add the doctor's information to the Message Center as a contact.

Print license numbers in HCFA - This number populates from Account > Provider Settings > eRx Info > State License Number field. This will be reflected in HCFA boxes 24j *(shaded area)* and 31.
