# Release Notes for DrChrono Web 2023-07-28

Last modified on 10/07/2026 2:10 pm EDT

## What's new

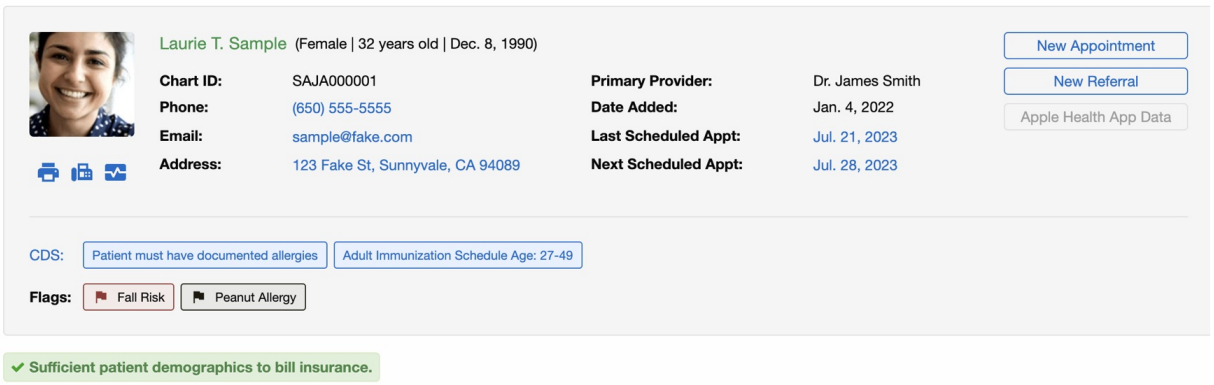

### Clinical

| Summary | Description | Additional Information |
|---|---|---|
| Idle time log out | After you're logged out due to idling, you are redirected to your previous location on the site when you log back in. | |
| Updated **Immunization** section for **Record Vaccination** tab | Rearranged the **Record Vaccination** screen to improve the page flow for the clinician entering the patient's immunization information. | Immunization Records |
| Patient flags removal from patient chart | This update removes patient flags from patient chart demographics. The goal is to make patient flag information easy to view throughout the clinical charting and note-taking experience. See the image below. | To turn this feature on, contact our Customer Support team via chat within the app, via email at support@drchrono.com, or give us a call at (844) 569-8628. |

**Before**

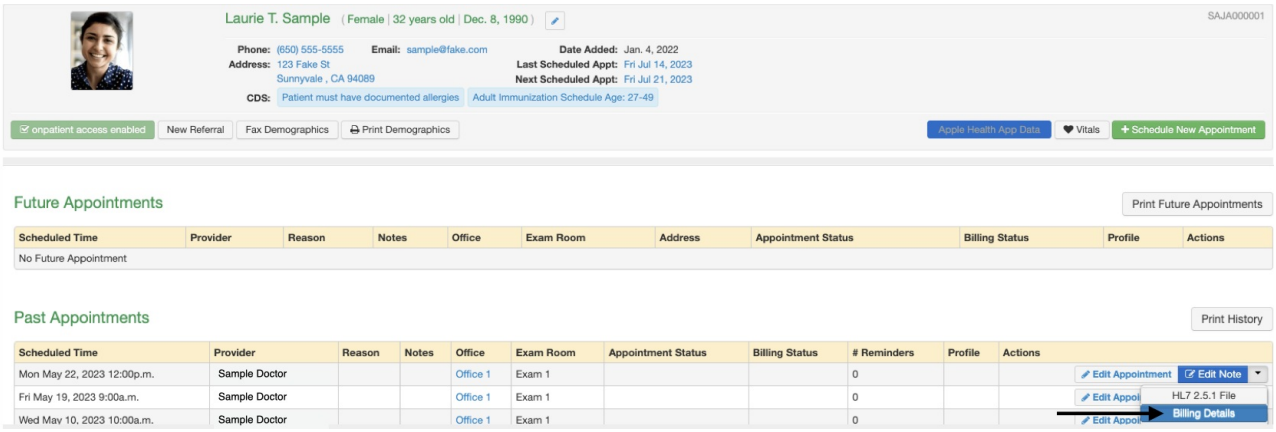

**After**

### Practice Management

| Summary | Description | Knowledge Base Article |
|---|---|---|
| API - Add First and Last Name Fields for Staff Users | Added staff first and last name endpoints to the API. | |
| Access the Billing Details from the Appointments Tab in the Chart | You can now access the billing details screen from the appointments section of the patient's chart.<br>See the image below. | |

# Resolutions

| Summary | Description |
|---|---|
| API - Tasks Note is not showing authenticated user | Fixed an issue when using the API where task notes were not showing the authenticated user. |
| Print Demographics Date of Birth Format Change | Resolved an issue that changes the date of birth format from YEAR-MONTH DAY for example, 2000-09-10 to MONTH-DAY-YEAR 09-10-2000 when you print demographics from the patient's chart. |
| Successfully scheduled CCDA export notification | Users will not receive a notification alert popup for a successfully scheduled export. |
| Clinical note CPT code billing fix | The fix corrects the issue where the clinical note was duplicating or deleting added CPT codes in billing. |
| Clinical note missing information | If multiple instances of the note are opened, when modifying simultaneously, the user will receive the prompt “There is new form data not included in this note". The alert will allow the user to refresh the page and sign and lock with the most recent update. |
