

Release Notes for DrChrono Web

2023-07-28

09/17/2024 11:19 pm EDT

What's new

Clinical

Summary	Description	Additional Information
Idle time log out	After being logged out due to idling, users will be redirected to their previous location on the site after logging back in.	
Immunization section updated for Record Vaccination tab	Record Vaccination screen has been rearranged to make the flow of the page better for the clinician to input the immunization information for the patient.	Immunization Records
Patient flags removal from patient chart	<p>This update removes the patient's flags from the demographics within the patient chart. The goal is for patient flag information to be easily viewable on the patient chart throughout the clinical charting and clinical note experience.</p> <p>See below.</p>	<p>If you would like this feature enabled in your account, please reach out to your account manager.</p> <p>If you do not remember your account manager's contact information you can email accountmanager@drchrono.com.</p>

Resolutions

Summary	Description

API - Tasks Note is not showing authenticated user	Fixed an issue when using the API where task notes were not showing the authenticated user.
Print Demographics Date of Birth Format Change	Resolved an issue that changes the date of birth format from YEAR-MONTH DAY for example, 2000-09-10 to MONTH-DAY-YEAR 09-10-2000 when you print demographics from the patient's chart.
Successfully scheduled CCDA export notification	Users will not receive a notification alert popup for a successfully scheduled export.
Clinical note CPT code billing fix	The fix corrects the issue where the clinical note was duplicating or deleting added CPT codes in billing.
Clinical note missing information	If multiple instances of the note are opened, when modifying simultaneously, the user will receive the prompt "There is new form data not included in this note". The alert will allow the user to refresh the page and sign and lock with the most recent update.
