Accessing the Timeline on the iPhone

Last modified on 06/11/2025 1:25 pm EDT

Timeline is a feature that allows you to view your patient's history in chronological order. This feature is only available on the EHR app. To access the Timeline feature, you will need to have version 10.0.54 or a later update of the EHR/EMR app. If you don't know what version you have, check out our guide here.

Now, you'll see your patient's history in chronological form -- this is the Timeline feature. To use Timeline, you may use the filters on the left-hand side to narrow down your search while using the date boxes on the right-hand side to select a date range. Once your parameters are set, use your finger to scroll up and down on Timeline to view events in your patient's history. Tap **View** to see open the document.
