Billing Profiles and Fee Schedules

Last modified on 09/25/2026 4:44 pm EDT

When creating your billing profiles, the system will automatically pull in the price listed on your fee schedule, or you can override this price and enter a billing profile-specific price.

To set up a billing profile, please refer to this article.

1. Navigate to **Account > Custom Fields > Billing Profiles > Add New Profile**

2. Once you enter a CPT/HCPCS or Custom code, a new option, **Override Fee Schedule,** will open. Any price entered under the price column will override the fee schedule price. If the box is left empty, the fee schedule price will populate on the patient claim.
