

Using the Qty/Min feature in the Live Claims Feed

09/16/2024 9:33 am EDT

Often when assembling a patient's invoice, there will be multiple units of the same CPT/HCPCS/Revenue Code. DrChrono has integrated a Qty/Min feature to make accounting for multiple units of the same code a breeze!

1. Navigate to **Billing > Live Claims Feed**
2. Inside patient appointment > **Line Item Transaction section > Qty/Min box**

<input type="checkbox"/>	Rev/Check	Service/Posted	Service Code & Modifiers	Qty/Min
				Totals:
<input type="checkbox"/>	U Revenue		-	
+ Add Line Item		x Delete Selected		

This box can accept quantity (i.e. 1, 2) or time units if billing for anesthesia services. The number in this column will be multiplied by the listed price to populate a billed amount.

<input type="checkbox"/>	Rev/Check	Service/Posted	Service Code & Modifiers	Qty/Min	Price	Billed
--------------------------	-----------	----------------	--------------------------	---------	-------	--------
