

Using the Qty/Min feature in the Live Claims Feed

Last modified on 11/14/2024 3:53 pm EST

Often when assembling a patient's invoice, there will be multiple units of the same CPT/HCPCS/Revenue Code. DrChrono has integrated a Qty/Min feature to make accounting for multiple units of the same code a breeze!

1. Navigate to **Billing > Live Claims Feed**
2. Inside patient appointment > **Line Item Transaction section > Qty/Min box**

<input type="checkbox"/>	Code/Check Date	Description	Mods/Posted Date	Service Date ⓘ	EPSDT	Qty/Min	Dx Pointers				
							Totals:				
<input type="checkbox"/>	U	↓	<input type="text"/>	<input type="text"/>	From date	To date	<input type="checkbox"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

This box can accept quantity (i.e. 1, 2) or time units if billing for anesthesia services. The number in this column will be multiplied by the listed price to populate a billed amount.

<input type="checkbox"/>	Rev/Check	Service/Posted	Service Code & Modifiers	Qty/Min	Price	Billed
--------------------------	-----------	----------------	--------------------------	---------	-------	--------
