

Recovering Archived Clinical Forms

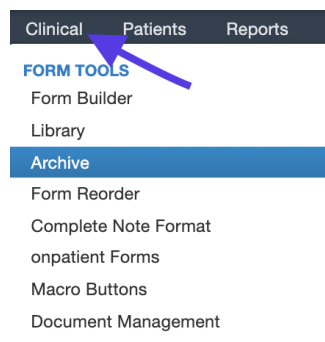

Last modified on 01/12/2026 4:07 pm EST

Beginning in **February 2026**, we will start retiring the legacy Form Builder as part of the transition to **Clinical Form Management**. For more details and answers to common questions, please refer to our [FAQ](#) article.

You can recover templates (forms) that you have archived (deleted) from the form builder to use again.

1. Go to **Clinical > Archive**.

2. Click on **Restore** beside the respective template. The selected form will return to the "Additional" section of your Form Builder and be available for use.

5 Element Chart	Restore
6 Month Visit	Restore
92004 Eye Exam	Restore

Learn more about [Best Practices for Building Custom Forms](#) which is designed to help you make the most of the clinical notes feature.
