

DrChrono Payments: Stripe - Understanding Processing Fee Billing

Last modified on 09/18/2024 2:05 pm EDT

Your credit card processing invoice will be set up with Stripe on a Daily Discount Pricing Model. Meaning, any processing fees are deducted from your daily sales or transaction totals. You can see a breakdown of these fees in your Stripe portal.

Having a daily discount pricing model will make managing cash flow easier and will provide a clearer understanding of your daily costs related to credit card processing.
