

# Release Notes for DrChrono Web 2023-06-16

09/17/2024 11:20 pm EDT

## What's new

### Billing and Payments

Summary	Description	Knowledge Base Article
Additional HCPCS codes	Three (3) HCPCS codes have been added to the DrChrono system and can be added to your fee schedule and included on patient claims.	
Additional HCPCS code added	HCPCS code Q4259, Celera dual layer or celera dual membrane, per square centimeter, has been added to the database and can be added to your fee schedule and included on patient claims.	
Print Selected HCFA-1500 forms from the Live Claims Feed	Selected bulk claims can now be printed from the Live Claims Feed. By using any of the search fields, you can identify and select multiple claim forms for varying patients and dates of service and have just those claim forms generated.	<a href="#">Printing selected HCFA-1500 forms from the Live Claims Feed</a>

### Clinical

Summary	Description	Knowledge Base Article
EPCS DEA Schedule Update	We have updated the EPCS module to check a medication's DEA Schedule for both the prescriber's state and the pharmacy's state. Whichever [prescriber or pharmacy] state has the more restrictive DEA schedule, is the DEA schedule that will be used on the electronic prescription.	<a href="#">Electronically Prescribing Controlled Substances Based on the DEA Schedule</a>
Patient List C-CDA XML Export	DrChrono now offers the ability to customize the export option from the Export C-CDA XML button via the Patient List screen. DrChrono has restricted the ability for users to generate multiple patient export C-CDA XML reports simultaneously.	<a href="#">Customize C-CDA XML Exports</a>

Generating patient C-CDA files	We refactored our C-CDA generator to reduce the time it takes to generate patient C-CDA files.	
--------------------------------	--	--

## Practice Management

Summary	Description	Knowledge Base Article
Add Change Log details regarding the api/care_plans endpoint.	Fixed an issue in the /api/care_plans endpoint. A bug caused the endpoint to incorrectly filter care plans, resulting in an empty response for some affected users. The issue has been resolved, and the endpoint now correctly retrieves and returns care plans for all users.	
Preferred_Pharmacy' Field to the api/patients Endpoint Backwards Compatability	This API update has been documented in the API documentation.	
Detect and prevent unverified new accounts from logging in	New accounts will be required to verify email. Existing users prior to this release will be able to log in without verification. All users created after this release will need to verify their email before logging in.	
Require new users to verify their email before they can log into DrChrono	New users will be required to verify their email address before they can log into DrChrono.	

## Resolutions

Summary	Description
Message Center Folders Name Required	Resolved an issue to show that the 'name' is a required field when creating a folder in the Message Center. Previously, the field did not appear as required.
Matching Office Order	Resolved an issue in which the order of the offices on the schedule view did not match the order in the appointment window.
