

Attaching a Lab Result to a Clinical Note on the iPhone

07/08/2024 7:56 pm EDT

To attach a lab result to a clinical note on the [EHR/EMR app](#), you can use the free draw tool to browse your patient documents. First, find and select a free-draw object on the form. You will need to have a free draw field already added to your form from the Form Builder on the web version of DrChrono.

To take a photo using your mobile device, you'll need to have a free draw object on one of the templates you'll be using during your appointment. Find that template and tap on the free draw object.

The screenshot shows the DrChrono mobile app interface. At the top, the status bar displays the time 11:10, signal strength, Wi-Fi, and battery icons. Below the status bar is a blue navigation bar with a back arrow, the text 'App Store', and icons for 'Tools', a heart, a person, and a menu. The main content area is divided into sections: 'HPI' with a text input field and a pencil icon; 'Is the patient new to practi...' with a green toggle switch; 'Findings' with a section header; 'Does the patient have a his...' with 'Yes' and 'No' radio buttons; 'Test' with two input fields separated by a slash; 'Pain Location' with a text input field and a vertical ellipsis; 'Single' with a text input field and a dot; 'Patient Diagram' with a 'Free Draw' button; 'Images/Documents' with a 'Free Draw' button highlighted by a black arrow; and a bottom bar with 'Include in Note' (green toggle) and 'Section Note' (checkbox).

Within the free draw field, on the bottom navigation bar, select the (

)icon to access the camera.

Tapping **History** will allow you to select images, uploaded documents, or previous clinical notes from the patient's documents. Only 1 page can be added to a free draw field. Tap the result to use.
