

How do I automatically copy ICD-10 diagnosis codes to my patient's chart?

07/08/2024 7:58 pm EDT

With the **Auto Set Problems** feature in the DrChrono EHR, you have the option to type in ICD-10 codes into your appointment and have them automatically added to your patient's problem list. When paired with the Auto Set Diagnosis feature, those codes will be also automatically added to future appointments with the patient, saving you time while scheduling appointments.

To automatically copy your ICD-10 codes to your patient problem list, you will first need to enable the Auto Set Problem setting within your account settings.

To access this setting, first, go to **Account** and select **Provider Settings**.

- Within account settings, select the **Medical Billing** tab.

To view your patient's problem list, search for your patient to enter their chart then select **Problem List** from your

left-hand navigation pane.

The screenshot displays a medical software interface. On the left is a vertical navigation pane with the following items: Tasks (0), Problem List (3), Medication List (2), Send eRx, Allergy List (0), Drug Interactions (0), CQMs, Intake Data, and Lab Orders. A green callout box labeled "Problem List" with a white circle containing the number "3" has an arrow pointing to the "Problem List" item in the navigation pane. The main content area is titled "Active Problems" and includes two checkboxes: "Show Inactive Problems" and "Patient has No Known Active Problems". In the top right corner of the main area are buttons for "+ Add Problem" and "Print List". Below the checkboxes is a table with the following data:
